Additional Notes:

The following notes provide guidance when preparing and supporting a contract-pricing proposal when cost or pricing data are required:

Note 1: There is a clear distinction between submitting cost or pricing data and merely making available books, records, and other documents without identification. The requirement for submission of cost or pricing data is met when all accurate cost or pricing data reasonably available to the Offeror have been submitted, either actually or by specific identification, to the Contracting Officer (Raytheon) or an authorized representative. As later information comes into your possession, it should be submitted promptly to the Contracting Officer (Raytheon) in a manner that clearly shows how the information relates to the Offeror's price proposal. The requirement for submission of cost or pricing data continues up to the time of agreement on price, or an earlier date agreed upon between the parties if applicable.

Note 2: By submitting your proposal, you grant the Contracting Officer (Raytheon) or an authorized representative the right to examine records that formed the basis for the pricing proposal. That examination can take place at any time before award. It may include those books, records, documents, and other types of factual information (regardless of form or whether the information is specifically referenced or included in the proposal as the basis for pricing) that will permit an adequate evaluation of the proposed price.
