REDCOM OA&M Web App
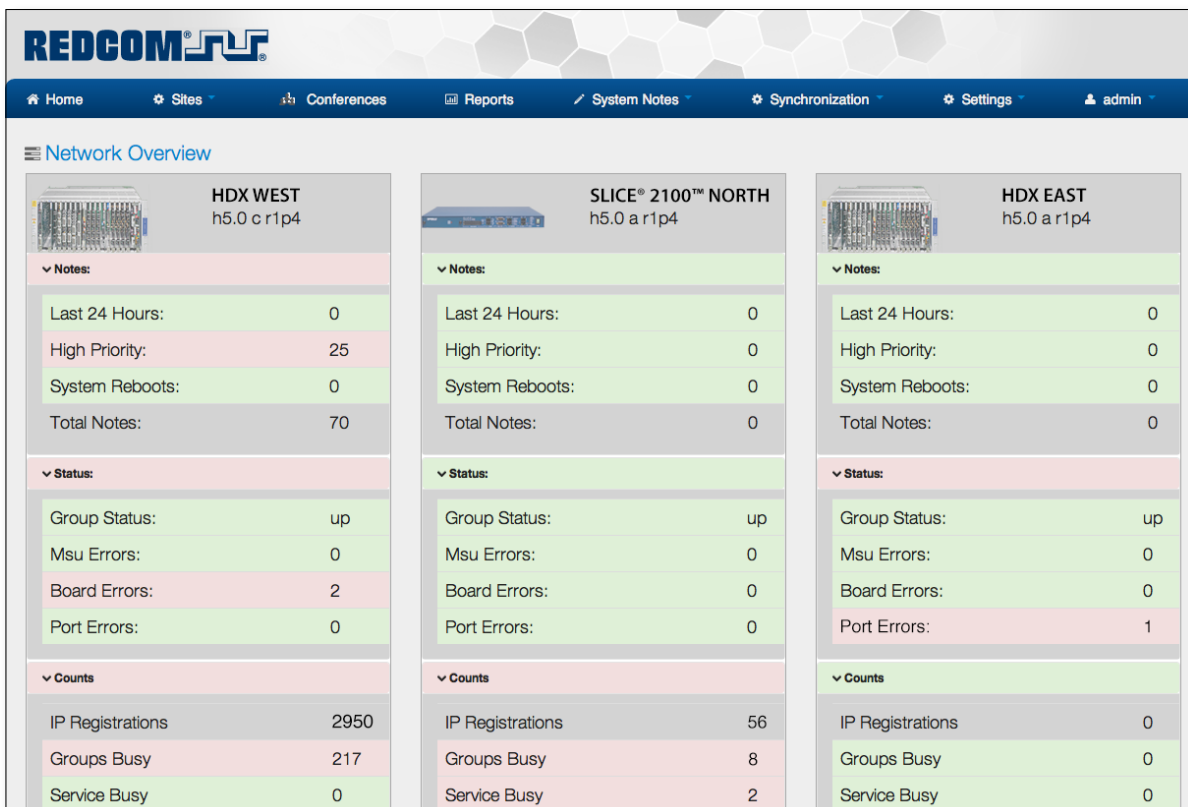

▶ *Reduces operating expenses, increases productivity, and lowers staff workload*

▶ *Single point of Operation, Administration, and Maintenance (OA&M) for multiple REDCOM switches*

▶ *Accessible from a web browser on a computer, smartphone or tablet*
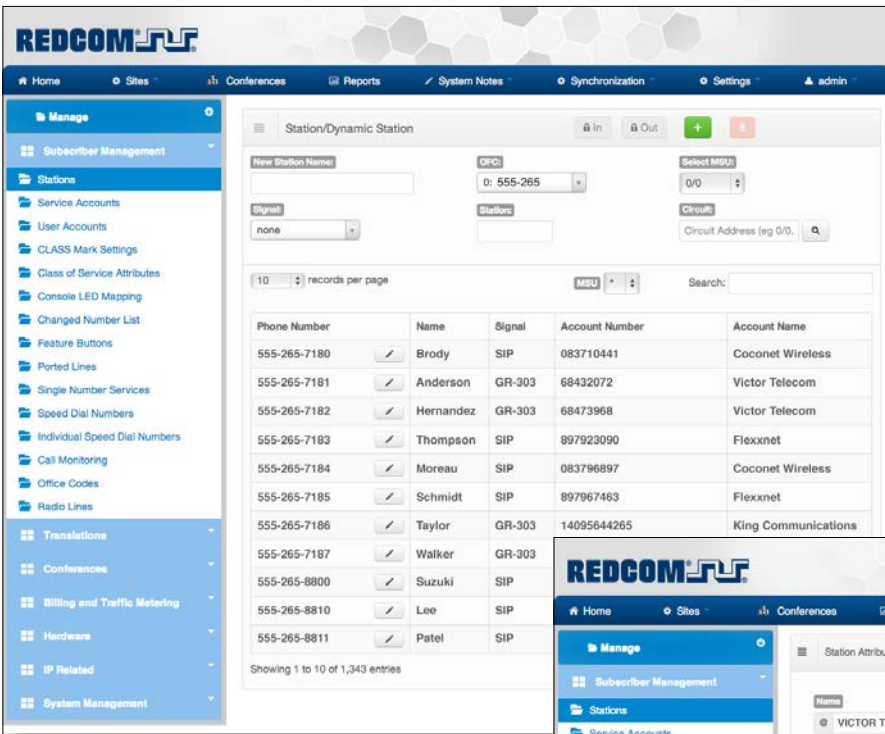

The REDCOM OA&M Web App provides network administrators with an easy-to-use interface for managing REDCOM systems. The modern and responsive design is easy to navigate, enabling administrators to quickly add new lines, change features and make updates to REDCOM systems faster than ever before.

FEATURES & BENEFITS

- Network Overview screen provides a summary of all REDCOM systems in the network.
- Monitor the health of the network, quickly identify problems, and instantly navigate to the proper screen to configure a solution.
- Clean, organized interface makes it simple to configure all switch options.
- Integrated help system makes it easy to find the right options and settings.
- Quick access to system features, including subscribers, translations, billing, IP functions, and conferencing.
- Allows multiple technicians to administer each switch.
- Station configuration screen enables quick VoIP station deployment with easy configuration and provisioning.
- Secure HTTPS interface.
- Accessible from a modern HTML5 web browser, such as Internet Explorer 10+, Firefox, Chrome, and Safari.

The **Network Overview** screen provides an interactive graphic view of your entire network and gathers critical performance data to quickly identify issues.
