PEX Crimpers

- Reed PXCR and PEXOH crimpers squeeze the copper rings used on brass fittings, making PEX installation a breeze.
- The Reed design eliminates tool marks and distortion on the rings.
- For one-hand use consider the PEXOH12 or PEXOH34.
- Each crimper features a go/no-go gauge.

PEX systems are used for potable water lines, radiant heat, snow melt and ice rink systems, among other applications.
