

**PIPE TOOLS & VISES  
SINCE 1896**

## **RSP1 Ratchet Shears**

Ratchet shears with hardened steel blades are ideal for cutting PVC, PE, PP, PEX, and ABS pipe.

For CPVC, use RSP1 ratchet shears because of blade thinness and finish. RSP1 also cuts PVDF well.

The pointed blade in the one-hand model RSP1 helps start the cut in tough plastics such as CPVC, and helps avoid bounce in thin wall material.

All ratchet shears' blades can be easily sharpened or replaced, enhancing performance and saving money. These tools are not disposable and perform better, longer, and for less money over the tool's lifetime.

**RSP1 #04276**

**Actual capacity = 1.66 inches (42 mm)**

**Replacement Blade**

**RSP1B #94276**
