TAPPING MACHINES

Reed's Direct Tapping Machine is used to drill and tap water mains while under pressure, then to install 3/4" or 1" corporation stops in a 2-step operation. It covers a range of 4" - 48" cast or ductile iron and C-900 PVC with the use of saddles and chain extensions. The TM1100 features a "flip clamp" star feed system. Anodized and epoxy-painted aluminum frames provide a lightweight yet strong machine for tough in-ditch applications. The swing valve allows easy changeout from drill tap to corporation without main shutdown. Friction style boring bar lock allows faster start with minimal adjustment.

TM1100 #09300 3/4" - 1" Tapping Machine

Item Code	Cat. No.	QTY	Description
99309	TM1100BBA	1	Boring Bar Assembly

DRILLING MACHINES

Drilling machines cut or drill through the pipe wall via the corporation stop inserted into the service saddle while under pressure. They use Reed D series drills or hole saws. The DM2100B machine consists of the base unit, which allows the customer to purchase separately individual corp adapters, drill or hole saw adapters, along with necessary drills or hole saws. With shell cutters and necessary adapters, these units can also be used on C-900 PVC pipe. DM2100110 is for use with Mueller® 110 compression corporation stops. DM2100CCNPT is a combination of 3/4" and 1" AWWA CC thread and 1 1/2" and 2" NPT thread adapters. DM2100UNIVERSAL has the base and accessories to work for AWWA and NPT threads up to 2".

NOTE: #99390 needed for iron body gate valves.

DM2100B #09301 Basic Drilling Machine

Each Reed Drilling Machine model starts with the DM2100B and builds from there. It is possible to purchase just the DM2100B which includes:

- Base Drilling Machine
- Handle
- Metal Toolbox
- 10" Adjustable Wrench
- Coupon Retaining Drill Bit
- Tapping Compound
- Brass Nipple
- Spud Wrench
- Instructions

No drill adapters, corp adapters or adapter assembly are included. These items can be purchased separately or found within different Drilling Machine models.

DRILLING MACHINE AND COMBINATION DRILLING/TAPPING MACHINE ACCESSORIES

After purchasing any one of the Drilling Machines, the customer must purchase the appropriate drill bit, hole cutter, or shell cutter.

D Series Drill Bit

Heavy Duty Carbide-Tipped Hole Cutter

Hole Saw Adapter

PVC Shell Cutter

D SERIES DRILL BITS

Drill bits are designed for use with Reed drilling machines and Mueller® ES/D5 only, both of which use saddles. These spiral drills are made from strong, high speed steel, are heat treated for longer life, are black oxide coated for corrosion resistance, and are much easier cutting than other drills as the spiral motion clears away from the cut. Recommended for cast iron and ductile iron, including cement-lined ductile iron.

Item Code	Cat. No.	Drill Size In.	Nom. Corp Size Thread Inlet*	Weight lbs.	kg
04379	D438	7/16	1/2" NPT & AWWA	0.2	0.1
04380	D688	11/16	3/4" NPT & AWWA	0.3	0.1
04381	D875	7/8	1" NPT	0.5	0.2
04382	D938	15/16	1" AWWA	0.6	0.3

*Check manufacturer's fitting specifications for proper hole diameter

HEAVY DUTY CARBIDE-TIPPED HOLE CUTTERS

For 1 1/2" and 2" taps with the correct adapter, these cutters provide more taps into mains than standard hole saws. Thicker walls, bigger carbides, and high-temperature brazing are the heavy-duty features that help withstand many cuts. These hole cutters also have a large slot for easy coupon removal. Heavy duty cutters are the best choice for cutting cast and ductile iron pipe, including cement-lined ductile iron.

Item Code	Cat. No.	Hole Saw Size In.	Nom. Corp Size Thread Inlet	Weight* lbs.	kg
04354	HDHS1438	1 7/16	1 1/2" NPT & AWWA	0.4	0.2
04355	HDHS1750	1 3/4	2" NPT	0.6	0.3
04356	HDHS1875	1 7/8	2" AWWA	0.7	0.3

*Estimated

HOLE SAW ADAPTER*

Item Code	Description
08413	1 1/2" and 2" Adapter for Heavy Duty Carbide-Tipped Hole Cutters. Suitable for cast iron and ductile iron, including cement-lined ductile iron.

*Included with purchase of a Reed DM2100 Series drilling machine.

PVC SHELL CUTTERS

Item Code	Cat. No.	Description	Nom. Corp Size
04385*	PL688	11/16" PVC Shell Cutter	3/4"
04386*	PL875	7/8" PVC Shell Cutter	1"
04387	PL1438	1 7/16" PVC Shell Cutter	1 1/2"
04392	PL1750	1 3/4" PVC Shell Cutter	2"

* These shell cutters need the #94150 drill adapter to mount into the boring bar of a Reed Drilling Machine.

CORP ADAPTERS

Item Code	Cat. No.	Description

* Old style for TM1000 / DM2000 machines.

COMBINATION DRILLING/TAPPING MACHINES

The CDTM machines are tapping machines with the necessary components for conversion to drilling machines. The CDTM1100 is a TM1100 with components for converting to a DM1100. The CDTM2100 is a TM1100 with components for converting to a DM2100. It utilizes Reed Drill Taps (p. 1) and Reed D Series Drill Bits, Hole Cutters or PVC Shell Cutters (p. 4). These items must be purchased separately.

✓ WHY REED?

CDTM machines provide both the direct tapping and saddle drilling machine in one metal box. Combination units save money versus buying two separate machines.

PVC DRILLING MACHINES

The DMPVC is a drilling machine for PVC pipe.
