AOU36RLXFZH

*Not all heating systems are created equal.
Without the right technology, a system
won't work when its needed most.*

Protection from the Winter's Coldest Temperatures

When the temperature drops you don't want to be left in the cold. It's important to choose a heat pump system rated for the climate you live in. If your system doesn't operate in severe conditions you and your family could be left without any heat at all.

Fujitsu's line of mini-split heat pumps come in different sizes, styles, and rated outdoor temperatures. The Extra Low Temperature Heating (**xlTH**) Series features outdoor condensing units engineered to operate in temperatures down to -15°F, lower than any other mini-split available today.

Shown is an outdoor condensing unit used in a climate colder than it was rated for. Without the right technology, condensate freezes to the bottom of the unit and reduces its efficiency and heating output.

Ambient Heating Temperature of -15°F

Other models may go as low as -5°F, however they do not include a base heater and other advancements found in XLTH models.

Metal Fan Guard

While other models have a plastic fan guard, XLTH models use metal, which is most capable of withstanding the colder elements.

Base Heater

When temperatures reach 36°F, a built-in heater warms the base of the outdoor unit so that condensation doesn't freeze. Without a heater, freezing condensate can cause noise, damage to the fan blade, condenser, and system performance.

Base Drainage Holes

The cultivated base design discharges melted water through many holes located at the bottom of the unit.

The base of Fujitsu's XLTH outdoor condensing units.

Improved Heating Capacity

Heating capacity at low outdoor temperatures was improved by adopting a large heat exchanger and a high capacity compressor.

Have Peace of Mind with Fujitsu's XLTH Heat Pumps

Drain hole is not filled, no freezing of base

Freezing where there is no heater

Condition: Indoor temp. of 68°FDB / outdoor temp. of 5°FDB, Heating mode, High airflow volume. Operation for 24 hours.

Wall Mounted High-SEER 9, 12 and 15,000 BTU Systems

Among the World's Most Efficient Heat Pumps

Systems feature high efficiencies and are **ENERGY STAR® Qualified**, meaning lower utility bills for home and business owners.

Power Diffuser

A power diffuser operates automatically in either heating or cooling mode to optimally control the airflow. A comfortable space is quickly achieved.

Cooling

During cooling mode, far reaching horizontal airflow quickly creates a comfortable space throughout the entire room.

Heating

During heating mode, vertical airflow provides comfortable floor level heating.

ESP Energy Saving Program

ESP knows how to save you money even when you forget. If you leave the room without turning the unit off, ESP knows that you left and 20 minutes later, set temperature is increased by 4°F when cooling and reduced by 8°F when heating. When you come back to the room, it returns to previous operating mode. This prevents wasteful operation to save energy without you having to think about it.

Standard Features

- Wireless Remote Control
- Economy Mode
- Apple Catechin Filter
- Energy Saving Program
- Ion Deodorizing Filter
- Quiet Mode (Indoor)
- Sleep Timer
- Low Noise Mode
- 24 Hour Timer
- 3rd Party Device Control+
- Weekly Timer
- Dry Mode
- Auto Louver: 4-Way
- Auto Mode
- Powerful Operation Mode
- Minimum Heat (50°F/10°C)
- Auto Restart/Reset
- Auto Changeover
- Low Ambient Cooling
- Cold Prevention
- Remote Temp. Sensor*

Designer wireless remote control

* Available only with optional wired remote controller and optional interface kit.
 + Available only with optional interface kit. Operation monitoring and On/Off control only.

Stylish, slim and elegant, these wall mounted ductless heat pumps are designed for single rooms. These systems feature long piping lengths and low ambient heating and cooling, making them great for solving various application-specific problems. With more efficient zone control, ductless mini-splits are perfect for renovations, restorations, conversions, and add-ons.

Extended Line Set

Long piping lengths between indoor and outdoor units provides flexibility and increased applications.

Energy Efficient

All systems feature high efficiencies and are **ENERGY STAR® Qualified**, meaning lower utility bills for home and business owners.

Floor mount systems are ideal for residential radiator replacements or any room with limited upper wall space, like a kitchen or sunroom.

- Compact size
- Available in 9, 12, or 15,000 BTU single zone models
- Heat pumps provide both cooling and heating
- Feature twin airflow for improved heat delivery
- Designer remote control

At less than 24" high and 30" wide, floor mount models fit easily under a standard window and can replace a radiator twice its size while producing more capacity.

Features

2-Fan and Wide Airflow

Having both upper and lower airflow quickly warms or cools the entire room. Floor mount can be set in "Upward Airflow Only" when occupants wish not to have feet warmed or cooled.

Flexible and Easy Installation

Energy Efficient

All systems feature high efficiencies and are **ENERGY STAR® Qualified**, meaning lower utility bills for home and business owners.

Individual Zoning Control

Why pay to heat or cool areas that no one is occupying? Halcyon systems can have as many as eight indoor air handlers (covering eight zones or areas) connected to one outdoor unit. Since each of the zones will have its own thermostat, you only heat or cool the areas you want, and not the areas that are unoccupied.

* The optional kit "K9FZ1818 (UTP-MU36A2)" is necessary for dual zone system "18+18".
 **Wall mounted type ASU18RLF cannot be connected in this combination.
 "-" represents available circuit for future expansion when connecting this combination.

Applications

Where can mini-splits be used?

- Convenience stores
- Fast food chains
- Fire houses
- Police stations
- Oil rigs
- Bars
- Sunrooms and additions
- Warehouses
- Nursing homes
- Small offices
- Older homes
- New construction homes
- Schools
- Places of worship
- Hospitals and medical facilities
- Restaurants
- Computer rooms
- Hotels and motels
- Car washes
- ATM vestibules

Just about any place that requires comfort!

4 Indoor Model Styles to Choose From

Halcyon systems are some of today's most advanced forms of heating and air conditioning, being super quiet, as well as highly energy efficient. With 4 indoor unit styles to choose from, there's a Halcyon system to fit every décor .

Wall Mounted

They mount high on a wall, out of sight and do not require ductwork, increasing energy efficiency.

- Quiet operation
- Easy maintenance
- High delivered efficiency means lower utility bills

Floor Mounted

Floor mount systems are ideal for residential radiator replacements or any room with limited upper wall space, like a kitchen or sunroom.

- Compact size fits easily under a standard window
- Features twin airflow for improved heat delivery
- Designer wireless remote control

Compact Cassette

Cassettes are extremely discreet, with only the grille showing in the ceiling. They use the latest fan technology to distribute the conditioned air evenly.

- Wired remote control (wireless is optional)
- Powerful turbo fan operation
- Fits into a standard 2' x 2' ceiling grid

Available in XLTH series as Multi-zone only.

Slim Duct

Mounted in a ceiling or in a framed enclosure below a ceiling. They use minimal ductwork and remain very energy efficient.

- Concealed and out of sight
- Look of central air with the efficiency of a mini-split
- Less ducts = higher efficiency

Available in XLTH series as Multi-zone only.

Optional Accessories

Remote Controls (Compatible with RLS3H, RLXFWH, RLXEH and RLFFH Series)

Wired Remote Controller UTY-RNNUM

The wired remote controller with its unique lock function and sleek design provides full feature access to property managers, building owners, and facility maintenance, as well as providing basic comfort features to tenants, employees, and teachers.

Wired Remote Controller UTY-RVNUM

Features a large backlit LCD display and displays the room temperature. Provides full feature access to property managers, building owners, and facility maintenance, as well as providing basic comfort features to tenants, employees, and teachers.

Simple Remote Controller UTY-RSNUM

Suitable when only basic operations are required for hotels, offices and other places where there is frequent arrival and departure of occupants. Remote does not allow any timer settings.

Touch Panel Remote Control (Compatible with System 30RLXEH)

Wired Remote (Touch Panel) UTY-RNRUZ1

Features a large backlit LCD display and displays the room temperature. Provides full feature access to property managers, building owners, and facility maintenance, as well as providing basic comfort features to tenants, employees, and teachers.

Dry Contact Kit (Compatible with RLS3H and RLFFH Series)

Dry Contact Wire Kit UTY-XWZXZ5

Turns system on or off using a normally open circuit. For example in home automation, BMS integration of only On/Off operation, occupancy sensor, key card switch, or lead-lag control of other heating/cooling devices.

Interface Kit (Compatible with RLS3H Series)

Interface Kit UTY-TWBXF1

Required to connect the ASU9RLS3, ASU12RLS3 and ASU15RLS3 to Wired Remotes UTY-RNNUM and UTY-RVNUM, Dry Contact Wire Kit UTY-XWZXZ5, and Simple Remote Control UTY-RSNUM.

Interface Kit (Compatible with RLXFWH and RLXEH Series)

Dry Contact Wire Kit* UTY-XWZX

Turns system on or off using a normally open circuit. For example in home automation, BMS integration of only On/Off operation, occupancy sensor, key card switch, or lead-lag control of other heating/cooling devices.

Interface Kits (Compatible with System 30RLXEH)

Interface Kit UTY-XCSXZ1

Required to connect ASU30RLE to Wired Touch Panel Remote UTY-RNRUZ1, Wired Remote UTY-RVNUM, Wired Remote UTY-RNNUM, Simple Remote UTY-RSNUM, Dry Contact Wire Kit UTY-XWZX, and Lead Lag Control function[^].

Interface Kit Box UTY-GXXB

Used to conceal Interface Kit UTY-XCSXZ1.

Outdoor Unit Input/Output Connector UTY-XWZXZ3

Gives the ability to limit the noise of the unit*, stop the outdoor unit, limit power consumption*, control the operating mode (Htg/Clg), or use output status to see if the compressor is running. You will need to order a kit for each option.

*Will reduce capacity.

Multi-Zone Indoor Model Accessories (Compatible with AOU18/24/36RLXFZH)

* Wall mounted ASU7, 9, and 12RLF1 require accessory interface kit #UTY-XCBXZ2 in order to connect these devices to them.

¹ Only multi-zone models greater than specific serial numbers are compatible with UTY-RVNUM. See Service Bulletin 0031 for serial number compatibility.

[^] Wired remotes cannot be used when using this feature. This includes UTY-RNRUZ1, UTY-RVNUM, UTY-RNNUM, UTY-RSNUM.

Halcyon It's Green and It's In There!

Year Round Comfort	Heat pumps provide both heating and cooling for year round comfort in most climates.
Cruise Control	Compressors only run as fast as they need to handle the cooling or heating demand.
Clean Air	High performance filters remove dust, odor and improve indoor air quality.
Timer	24-hour programmable timer allows for on/off cycle control of system.
Earth Friendly	Low ozone depleting potential (ODP) refrigerant R410a used in all models.
Oscillating Fan	Auto Louver redirects airflow with up and down.
Savings	High energy efficiencies slash utility bills by up to 25%.
Rebates	Many utility companies offer rebates for installing energy efficient equipment.
