

# EUE-D300 SteelCentral Aternity Administrator Advanced

## Course Overview

This one-day class is the third course in the SteelCentral Aternity Administrator learning path, which helps Riverbed customers and partners effectively administer, maintain and troubleshoot an Aternity platform deployed on-premise. This course focuses on advanced deployment, setup, administration and maintenance tasks to support complex real-world administrative scenarios.

This course is specifically designed for enterprise IT core teams who will be administering SteelCentral Aternity on premise and supporting it. Typical participants would include the designated Aternity administrators and subject matter experts, as well as other engineers performing occasional administrative tasks on the platform.

## Course Topics

### **Platform Deployment and Setup Advanced**

- Understand complex deployment and setup concepts and tasks such as SSL configuration, load balancing, large deployment optimizations, and advanced derived attributes.

### **Platform Administration and Maintenance Advanced**

- Perform practical administration and maintenance tasks such as dashboard administration, database schemas, health checks, and practical troubleshooting of a real platform.

## Course Availability

### **Classroom Training - 10 Training Credits**

Classroom training is available to any Riverbed customer or partner and includes lectures by a Riverbed Certified Solution Instructor and access to the Riverbed University eLab for hands-on experience. Each class is priced per student attendee. For larger classes of eight or more students, we recommend on-site training.

### **Online Training - 10 Training Credits**

Online training is taught remotely. Each online training session includes real-time lectures with a Riverbed Certified Solution Instructor and remote access to the Riverbed University eLab. Each class is priced per student attendee with a maximum of 16 students.
