

Course Overview

This one-day class is the first course in the SteelCentral Aternity Monitors Developer learning path, which helps Riverbed customers and partners administer, develop, and troubleshoot managed applications and custom activities for all application and device types, on SteelCentral Aternity SaaS and on-premise deployments. This course focuses on creating and administering managed applications, and understanding simple activity signature and device monitoring concepts.

This course is specifically designed for technical engineers who will be creating and maintaining the SteelCentral Aternity activities and monitors. Typical participants should have an XML and scripting background, as well as core understanding of interactions between applications and the underlying operating systems, browsers, and network elements.

Course Topics

Aternity Primer

- Understand basic platform value, concepts, and usage.

Monitoring Configuration Foundations

- Understand the value of monitoring core administration of managed applications, and web page monitoring configuration.

Activity Signatures Foundations

- Understand the Agent deployment process, and the general monitor development concepts and processes.

Course Availability

Classroom Training - 10 Training Credits

Classroom training is available to any Riverbed customer or partner and includes lectures by a Riverbed Certified Solution Instructor and access to the Riverbed University eLab for hands-on experience. Each class is priced per student attendee. For larger classes of eight or more students, we recommend on-site training.

Online Training - 10 Training Credits

Online training is taught remotely. Each online training session includes real-time lectures with a Riverbed Certified Solution Instructor and remote access to the Riverbed University eLab. Each class is priced per student attendee with a maximum of 16 students.
