

EUE-N300 SteelCentral Aternity Analyst Advanced

Course Overview

This one-day class is the third course in the SteelCentral Aternity Analyst learning path, which helps Riverbed customers and partners successfully perform analytical duties using SteelCentral Aternity, deployed as either SaaS or on-premise. This course focuses on using the dashboards and ad-hoc analysis to monitor, validate, troubleshoot and analyze advanced application, device and user performance aspects.

This course is specifically designed for enterprise IT core teams using SteelCentral Aternity to analyze and act on their enterprise performance data. Typical participants would include help desk teams, application owners, desktop engineers, IT managers and executives, as well as the designated Aternity administrators.

Course Topics

Use Cases Advanced for Analysts

- Use the platform dashboards and ad-hoc analysis to monitor, troubleshoot, validate, and analyze complex performance issues and device inventories.

Advanced Data Mining

- Perform practical performance investigations using advanced ad-hoc analysis techniques.

Course Availability

Classroom Training - 10 Training Credits

Classroom training is available to any Riverbed customer or partner and includes lectures by a Riverbed Certified Solution Instructor and access to the Riverbed University eLab for hands-on experience. Each class is priced per student attendee. For larger classes of eight or more students, we recommend on-site training.

Online Training - 10 Training Credits

Online training is taught remotely. Each online training session includes real-time lectures with a Riverbed Certified Solution Instructor and remote access to the Riverbed University eLab. Each class is priced per student attendee with a maximum of 16 students.
