EUE-D200 SteelCentral Aternity Administrator Essentials

riverbed University

Course Overview

This one-day class is the second course in the SteelCentral Aternity Administrator learning path, which helps Riverbed customers and partners effectively administer, maintain and troubleshoot an Aternity platform deployed on-premise. This course focuses on more complex administration tasks, while practicing actual deployment, setup, usage, administration and maintenance scenarios in the lab.

This course is specifically designed for enterprise IT core teams who will be administering SteelCentral Aternity on premise and supporting it. Typical participants would include the designated Aternity administrators and subject matter experts, as well as other engineers performing occasional administrative tasks on the platform.

Course Topics

Platform Deployment Essentials
• Practice actual installation, upgrade, and general deployment tasks in the lab.

Platform Setup and Use Cases Essentials
• Perform practical setup tasks and data analysis on a real platform.

Platform Administration and Maintenance Essentials
• Perform practical common administration and maintenance tasks on a real platform.

Course Availability

Classroom Training - 10 Training Credits
Classroom training is available to any Riverbed customer or partner and includes lectures by a Riverbed Certified Solution Instructor and access to the Riverbed University eLab for hands-on experience. Each class is priced per student attendee. For larger classes of eight or more students, we recommend on-site training.

Online Training - 10 Training Credits
Online training is taught remotely. Each online training session includes real-time lectures with a Riverbed Certified Solution Instructor and remote access to the Riverbed University eLab. Each class is priced per student attendee with a maximum of 16 students.
