

EUE-DF SteelCentral Aternity Administrator Full

Course Overview

This four-day class covers the complete SteelCentral Aternity Administrator learning path, which helps Riverbed customers and partners effectively administer, maintain and troubleshoot an Aternity platform deployed on-premise. This class consists of the Administrator Foundations, Administrator Essentials and Administrator Advanced courses delivered in sequence.

This course is specifically designed for enterprise IT core teams who will be administering SteelCentral Aternity on premise and supporting it. Typical participants would include the designated Aternity administrators and subject matter experts, as well as other engineers performing occasional administrative tasks on the platform.

Course Topics

Aternity Primer

- Understand basic platform value, concepts and usage.

Platform Intro and Deployment for Admins

- Understand basic platform concepts and components, screens and usage, and the platform sizing and deployment process.

Platform Setup and Administration Foundations

- Understand the practical steps and considerations for the common setup and administration tasks such as external integrations, location mapping, user management, and monitors configuration.

Platform Maintenance Foundations

- Understand common platform troubleshooting approaches, screens, and logs.

Monitors Development Primer

- Understand basic managed application configuration, as well as monitor development concepts and processes.

Platform Deployment Essentials

- Practice actual installation, upgrade, and general deployment tasks in the lab.

Platform Setup and Use Cases Essentials

- Perform practical setup tasks and data analysis on a real platform.

Platform Administration and Maintenance Essentials

- Perform practical common administration and maintenance tasks on a real platform.

Platform Deployment and Setup Advanced

- Understand complex deployment and setup concepts and tasks such as SSL configuration, load balancing, large deployment optimizations, and advanced derived attributes.

Platform Administration and Maintenance Advanced

- Perform practical administration and maintenance tasks such as dashboard administration, database schemas, health checks, and practical troubleshooting of a real platform.

Course Availability

On-Site Training

On-Site training is available exclusively for one customer at a customer-designated facility. Each class includes lectures by a Riverbed Solution Instructor and remote access to the Riverbed University eLab. Each class is priced per event and is ideally suited for eight to fourteen students.
