

EUE-N100 SteelCentral Aternity Analyst Foundations

Course Overview

This one-day class is the first course in the SteelCentral Aternity Analyst learning path, which helps Riverbed customers and partners successfully perform analytical duties using SteelCentral Aternity, deployed as either SaaS or on-premise. This course focuses on using the dashboards to monitor, validate, troubleshoot and analyze basic application, device and user performance aspects.

This course is specifically designed for enterprise IT core teams using SteelCentral Aternity to analyze and act on their enterprise performance data. Typical participants would include help desk teams, application owners, desktop engineers, IT managers and executives, as well as the designated Aternity administrators.

Course Topics

Aternity Primer

- Understand basic platform value, concepts, and usage.

Platform Foundations for Analysts

- Understand platform value in various IT settings, core platform concepts, and main dashboards.

Use Cases Foundations for Analysts

- Use the platform dashboards to examine basic application, device, and user performance aspects.

Course Availability

Classroom Training - 10 Training Credits

Classroom training is available to any Riverbed customer or partner and includes lectures by a Riverbed Certified Solution Instructor and access to the Riverbed University eLab for hands-on experience. Each class is priced per student attendee. For larger classes of eight or more students, we recommend on-site training.

Online Training - 10 Training Credits

Online training is taught remotely. Each online training session includes real-time lectures with a Riverbed Certified Solution Instructor and remote access to the Riverbed University eLab. Each class is priced per student attendee with a maximum of 16 students.
