ROMAC Hardware Resource Company (HRC)

ROMAC HRC has been manufacturing mounting hardware kits for molded case circuit breakers (MCCB) since 1977, and the new "EZCan" Line of custom enclosures were developed in 2009. Our first customers were switchgear builders, electrical distributors and electrical contractors. All of these clients had requirements for hardware that was either unavailable from the original manufacturer or it was prohibitively expensive. **ROMAC HRC** filled the gap with manufacturing experience, flexibility of design, and reasonable cost.

When combined with EZCan mounting kits, the EZCan Line can house most major electrical OEM's circuit breakers.

Already have a switchboard, but need it to hold a different OEM's MCCB? **ROMAC HRC** hardware mounting kits are the solution that saves you money.

ROMAC HRC excels in helping customers acquire both commonly available and hard-to-find MCCB mounting kits. Our prices are very competitive, our inventory is solid, and our product knowledge and quality are unsurpassed. If you need a special kit that isn't available anywhere else, **ROMAC HRC's** engineers and fabrication technicians will custom manufacture it for you in a minimum amount of time.

ROMAC HRC now sells a full line of MCCB mounting gear and a full line of universal MCCB EZCan enclosures through a nationwide network of dealers and distributors. Let **ROMAC HRC** show you what our many customers have already discovered.

Highest Quality
+ Competitive Prices
+ Sound Inventory
= **ROMAC HRC**

EZCAN ENCLOSURES AND CIRCUIT BREAKER MOUNTING KITS
