DESCRIPTION:

Parabond M-4263 is a solvent free universal carpet/vinyl seam adhesive for use with all types of carpet backings in direct glue down installations, including vinyl backed carpet, cushion-backed vinyl flooring and fiberglass backed vinyl flooring.

DIRECTIONS:

1. Prepare flooring according to manufacturer's instructions.
2. Refer to CRI Carpet Installation Standards 2009 (or ASTM F 710) for additional information regarding sub-floor preparations, etc.
3. Apply a bead of seam adhesive along the trimmed edge (one-side) of the flooring or where the face yarn enters the backing for carpet.
4. Complete the seam by butting both sections of the flooring together while the adhesive is still wet (within 5-10 minutes).
5. If the seam tends to buckle, relieve the stress on the flooring.
6. Adhesive smears are easily cleaned with a damp cloth wet with water within 15 minutes. Use Mineral Spirits to remove dried adhesive. Avoid soaking carpet with solvent. Do not pour solvent directly on flooring.
