Soft Rubber Wheels

SR Wheels

RWM Caster's **Soft Rubber Wheels** are manufactured of quality materials with a resilient rubber tread bonded to a hard rubber core. These wheels are an economical choice for moving equipment.

SRO-3512-06

Features

Wheel Bearing: Choice of straight roller bearing or oilite bearings
Temperature Range: -40°F to 120°F

Applications

RWM Caster's Soft Rubber Wheels are a good choice for those applications where the average load is light with occasional loads using the full capacity of the wheel. Soft Rubber Wheels offer floor protection but can leave black marks on floors. Soft Rubber Wheels wear on rough surfaces and can become brittle if left outdoors, exposed to the elements. Economical in smaller sizes, Soft Rubber Wheels become more expensive in larger sizes, especially when premium rubber material is used.

options

DC Dust Cover
TG Thread Guards
WS Wheel Seals
