Business Summary

While Simpson Electric Company, chartered in 1934, is a firm with a distinguished past, it is just as importantly an organization with a dynamic present and a definite future. Simpson has been known as a panel meter company with sales in the United States and International and is now expanding into Contract Manufacturing.

Simpson Electric is a Native American owned, HUB Zoned certified company located in the United States.

Capabilities

We have expertise in producing analog / digital meters and test equipment. In addition, we offer circuit board assembly, cable assembly, lead assembly, shunt assembly, sand blasting, and screen printing.

With a highly trained core group of management, engineering, and hourly workers to assist with design, and all facets of your manufacturing needs.

We will provide estimates for Turnkey or labor only projects.

Facilities and Equipment

We have an assembly facility and a manufacturing facility with capabilities of:

- Punch Pressing (stamping)
- Tapping Machines
- Injection molding machines
- Compression molding machines
- Wave soldering machines
- Printing capabilities – to a variety of substrates, including (but not limited to) dials, plastic, glass, wood, ceramic, stainless steel, etc.
- Circuit board assembly
