

# ALWAYS ON FOR BUILDING SECURITY

Control access, ensure safety and reduce threats with **INDUSTRY-LEADING AVAILABILITY SOLUTIONS**

**With the threat of physical and electronic security breaches intensifying every day, you can't afford to risk downtime of your video monitoring systems (VMS), access control or other building security and automation systems. Let's face it, a security system can only provide protection if it's up and running — all the time. Anything less for your infrastructure and you run the risk of costly, dangerous and potentially life-threatening consequences.**

Stratus Technologies keeps all your applications up and running 24/7/365, enabling you to ensure safety, protect property and comply with stringent regulations. We offer a range of flexible always-on infrastructure solutions that are easy to deploy and manage, and backed by a support structure with a 30-year track record of success. It's no wonder that a wide range of facilities — from nuclear power plants, dams and military bases to airports, sporting arenas, industrial facilities, educational institutions and tourist attractions — put their trust in Stratus.

Our solutions can be rapidly deployed in your chosen environment — physical, virtualized or cloud — without any changes to your applications.

“When it comes to keeping our building management systems up and running, everRun just works; we almost don't really have to think about it. Gone are the days when I am getting calls at 2:00 a.m. or on weekends saying there is a problem related to the servers or a high availability solutions. everRun just works and works.”

**Todd Voight**

User Support Lead, Northwestern's Facility Management IT department

## Key Benefits

- Protect physical security and building automation applications with an always-on operating environment
- Detect potential problems and proactively take action before downtime becomes an issue
- Scale easily to accommodate changing business requirements
- Support remote and lights-out data centers through automation
- Meet compliance requirements for data integrity and reliability in regulated industries
- Leverage 24/7/365 global support

For an **Always-On** World

**Software Solutions**

Reliable and flexible availability software with built-in virtualization

Supports Windows® and Linux® environments deployed on industry-standard servers

Supports split-site deployment for disaster recovery

**Platform Solutions**

All-inclusive end-to-end solution provides worry free operations with integrated hardware, software and service

Intel® Xeon-based servers running Windows®, Linux®, VMware® and OpenVOS environments

Maximum application uptime and performance

**Services**

24/7/365 monitoring and proactive problem resolution

Expert professional services to define and manage an availability strategy

Certified best practices using performance management tools with predictive analytics

**Ensure your building security and automation systems are always on with Stratus**

For 30 years, organizations around the world — from Global Fortune 500 companies to small and medium-sized businesses — have relied on Stratus to keep their operations running around the clock. Get all the details at [www.stratus.com/security](http://www.stratus.com/security). You'll see how other organizations are keeping their security systems running with Stratus always-on solutions – and how you can, too.

**About Stratus**

Stratus Technologies is the leading provider of infrastructure based solutions that keep applications running continuously in today's always-on world. Stratus enables rapid deployment of always-on infrastructures, from enterprise servers to clouds, without any changes to applications. Stratus' flexible solutions — software, platform and services — prevent downtime before it occurs and ensure uninterrupted performance of essential business operations.

**Stratus' Always-On Solutions Solve Our Customers' Biggest Needs**

 **Flexible**

Our solutions support a range of environments — physical, virtualized or cloud — for building security and automation systems.

 **Easy**

Our products are easy to deploy and manage, and require no modifications to VMS, access control or other building security and automation applications.

 **Trusted**

Multiple organizations — from educational institutions, to nuclear plants and international airports — rely on Stratus to keep their building security systems up and running.
