Team Gaming Neptune DDR3 Series

Team Group's all new overclocking memory series – Neptune. Named after the coldest planet in the solar system, its high performance Neptune heat spreader is the best support for a powerful gaming laptop. Neptune series is developed and certified specifically according to Intel platform's XMP 2.0 standard. It provides absolute stability and reliability with laboratory-scale burn-in test and complete compatibility verification with best selling gaming laptops worldwide.

Neptune has a low key heat spreader with a gray nameplate. The logo of the trident symbolizes that players will possess the supreme godly power just as the god of the sea, Poseidon in Greek mythology. In addition, Team Group leads the industry by releasing the ultra high speed DDR3 1600MHz CL9 and 2133MHz CL11, both single and dual channel packages. If you wish to possess power close to god, Team Group's Neptune is the best choice for upgrading your platform.
