DDR4

Module | Elite Series

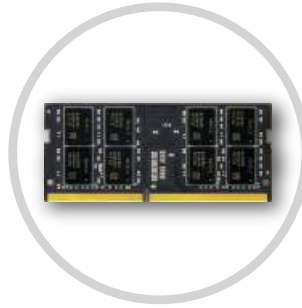

Team Elite (DDR4 2133/2400)

Team Group's Elite series has released an all new DDR4 SO-DIMM product which is compliant with JEDEC international standard. With only 1.2V of working voltage, it can save electricity use by 20% compared to its last generation. Therefore, the heat generated from the product itself can also be reduced and maintain the surrounding temperature of the system. It is 100% compatible with INTEL's latest X99 & Skylake chipset. With selected high quality IC chips and strict testing standard, it is the perfect choice for laptop users, who seek for excellent quality, optimal performance, stability and compatibility.

Main Feature

- All new generation product of DRAM module
- 1.2V memory module
- Massive 32GB Kit
- Lifetime warranty
- Completely compatible with X99 & Skylake chipset

Specification

Item	Specification
Type	NOTEBOOK
Module Specification	260 PIN SO-DIMM
Dram Configuration	512x8, 1024x8
Capacity	4GB / 4GBx2 / 8GB / 8GBx2 / 16GB / 16GBx2
Data Transfer Bandwidth	PC4 17000 / PC4 19200
Cl Value	CL15-15-15-36 / CL16-16-16-39
Working Voltage	1.2V
Pcb	8/10 LAYER PCB
Warranty	LIFETIME
