

OTG M132

USB
3.0**SMART DUAL DRIVE**for Smartphone & Tablet PC
with OTG Support

USB Drive | M132

Team USB Drive OTG | M132

The global popularity of mobile applications and devices such as smart phones and tablets brings out an increasing market of the peripheral products. In response to this market trend, Team Group launches the new Mobile series of flash drives to go with smart mobile devices. Sharing video/audio files without a data cable makes the connection between computer and mobile device more convenient and faster.

Double interfaces, easy operation

M132 is one of the Team Mobile series flash drives with COB packaging. The drive features both Micro USB & USB3.0 interface. The Micro USB allows the transfer of multimedia files in Android mobile devices to M132 for storage and direct viewing of pre-stored audio/video files. M132 is also a high-speed USB3.0 flash drive which is easy for users to save all kinds of documents and multimedia files.

Plug and play, Fast transmission

The Micro USB corresponding to cell phones and tablets is USB2.0. Its 480Mbps, the maximum transmission bandwidth is much higher than Wi-Fi and Bluetooth. When inserted into a mobile device, M132 provides fast data transmission which can save the mobile data usage and free from the limitation of Wi-Fi hotspots. You will be able to

share audio and video files with friends and family at anytime and anywhere. The port that connects to computers is a high-speed USB 3.0 flash drive that offers 85MB/second 20MB/sec of read/write speed. M132 gives the users a convenient and enjoyable mobile life with extreme transmission speed for both ports.

Compact size, easy portability

The metallic brushed finish goes with low-profile black tone. The smoked black cap for Micro USB prevents it from dust or shock. The device also features light weight and compact size. It comes with a trinket hole making it a perfect accessory.

Expanded capacity, endless storage

It is often for people to download a lot of audio and video files to smart phones/tablets. However, it is expensive to buy a mobile device with a large built-in capacity, not to mention the difference in prices. M132 is available with 16GB, 32GB and 64GB, which is more than enough to deal with the problem of insufficient storage capacity commonly seen in mobile devices.

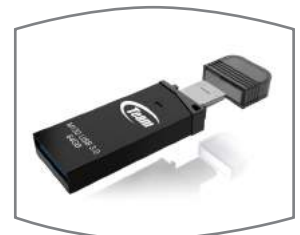

Main Feature

- New generation USB 3.0 & Micro USB in one package
- Support for smart phones and tablets equipped with OTG
- Backward compatibility with USB 2.0/USB 1.1
- Aluminum alloy casing with a compact size

Specification

Item	Specification
