Team USB Drive OTG | M161

USB Type-C On-The-Go

M161 is designed with OTG (On-The-Go) function and both interfaces (USB standard connector and Type-C) can be used for transfer. USB Type-C is smaller than the standard USB port slot. Users are able to plug in their devices smoothly no matter which side is up or down. In addition, it is compatible with Macbook (2015) or Android mobile devices, so your files are no longer restricted while transferring.

Extreme high speed transfer in a blink of the eye

M161 is using USB 3.1(Gen1) high speed transfer specification. It can greatly enhance transfer performance, and also downward compatible with USB 2.0 interface. The transfer speed and read speed per second can be reached 80MB/s above. It allows quick access for large files in a short time, so no more waiting for transfer.

Unrestricted mobility that Expand your storage capacity wherever you are

In response to the trend, new mobile devices are getting thinner and thinner, but the problem of insufficient capacity still occurs very often and the price for upgrade is also often too high to afford. M161 can be used on USB Type-C devices and offers up to 128GB of storage space. You are able to backup photos, videos and all sorts of files, or enjoy sharing precious data without worrying about the problem of insufficient capacity.

Smart rotate and no more cap loss

The smart 360° rotating cap design not only protects the connector when it's not in use, but also eliminates the trouble of losing the cap, and increasing efficiency and convenience of usage.

M161 offers all-around protection in waterproof and dust-proof

M161 is using COB (Chip On Board) assembly process to offer waterproof and dust-proof. It avoids data corruption or data loss which caused by external forces during the operation. It provides all-around protection to every moment of your precious memory.

Lightweight, thin, elegant and easy to carry

M161 is compact, lightweight, easy to carry around, and won't get in the way of other devices connectors. Its rotating cap can also prevent damage of the USB Type-C connector.

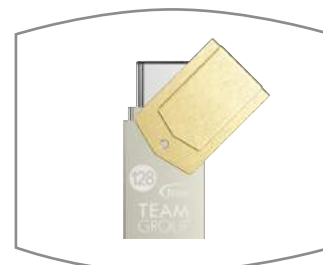

Main Feature

- Dual interface with USB Type-A and USB Type-C ports
- USB 3.1 Gen1 (USB 3.0) high speed transfer
- Unrestricted mobility that expands your storage capacity wherever you are
- Smart rotating cap design prevents cap losing.
- COB assembly process: waterproof and dust-proof
- Ultra mini and compact design

Specification

Item	Specification
Model	M161
Interface	USB 3.1 Gen1 (USB 3.0) & USB Type-C
Capacity	16GB / 32GB / 64GB / 128GB*
Performance	For PC : Read: up to 85 MB/s ; Write: up to 20 MB/s** (32GB and above) *Device with USB 3.1 port is required in order to achieve USB 3.1 Gen. 1 (USB 3.0) performance.
Color	Gold
Voltage	DC+5V
Weight	4g
Dimensions	30(L) x 12(W) x 6.2(H) mm
Operation System	Windows 10 / 8 / 7 / Vista, MAC OS 10.4 or later, Linux 2.6.33 or later Mobile devices running Android OS 4.1 or later With USB Type-C transmission joint smart phones and tablets (the device itself must support OTG function)
Warranty	Lifetime warranty

*1GB=1,000,000,000 Bytes. In OS system, it would be displayed as 1,000,000,000 Bytes / 1024 / 1024 / 1024 = 0.93GB

**Transmission speed will vary according to different hardware / software conditions, therefore the data can only used for basic reference.
