

OTG M151

for **Smartphone & Tablet PC**
with **OTG** Support

USB Drive | M151

Team USB Drive OTG | M151

With the popularity of smartphones and tablets on the rise around the world, Team Group Inc. introduces the M151, a whole new Mobile series portable storage product specifically designed for smart mobile devices in order to share image and video files without wires. It makes connecting your computers and mobile devices a breeze.

Composite materials with a simple concept

Designed with a minimalist concept, the M151 is a Team Mobile series USB flash drive made by composite materials. The compact body of this USB drive is anodized with a Titanium grey metallic brushed finish. The cap is in classic black color with gold font. The design is not only elegant on the outside, but also both practical and convenient.

Real time transmission, sharing life

The M151 has both interfaces of Micro USB and standard USB2.0. The files and multimedia files on Android mobile devices can be stored onto M151 through Micro USB interface and the files previously saved can be browsed directly. The M151 is also a standard USB2.0 flash drive which is able to connect with various types of desktop computers, laptops, tablets and smart phones. The M151 can be the multimedia database which linked easily between all devices including computers, USB interface devices and mobile devices.

Thoughtful design makes it easy to carry

The all new M151 is compact and weighs only 2.1g. It is easy to carry around and no extra spaces needed. In addition, M151's thoughtful design of a strap hole can go with a strap to perfectly match with user's personal belongings. It helps with avoiding the problem of losing the device, and it can also become a unique stylish accessory.

Unlimited storage capacity expansion

The M151 not only can save money for users of mobile devices, but also provides a wide range of capacity available for different needs, 8GB, 16GB and 32GB. By perfectly solving the problem of insufficient internal storage, it can easily turn mobile devices into a highly efficient and well used mobile multimedia database.
