Memory Card | micro SDHC Class10

Memory Card Series (micro SDHC Class 10)

As high-resolution videos becomes more popular, consumer's demand for high speed/high capacity multimedia storage also increased. Team Group Inc exclusively released the premium high transfer speed multimedia storage: microSDHC Class 10. Team Group's microSDHC Class 10 meets the SD 3.0 specification set by the SD Card Association, and is downward compatible with SD 2.0; it can be used on any cell phones, digital cameras (DSC), MP3 players, gaming devices and any other device that is marked with microSDHC support.

With FAT32 file system, up to 16GB of capacity, and max reading speed of 20 MB/s and max writing speed of 16 MB/s, microSDHC Class 10 is suitable for any high quality picture taking, music playing, gaming and business applications. Its high performance can support 1920x1080 60fps Full HD video/images and surround sound recording. Which can give user a smoother HD multimedia experience and satisfy today's diverse multimedia needs.

Together with Team Group's adaptor, the microSDHC Class 10 memory card is compatible with all digital devices available on the market marked with SDHC support. Device such as cell phones, digital cameras (DSC), MP3 players, gaming devices and personal digital assistants (PDA). Through microSDHC Class 10, user can fully enjoy high quality multimedia life with high storage performance.

Main Feature

- Meets the SD Card Association's SD 2.0/ SD3.0 standard and SDHC Class10 specifications
- The size is only 1/4 of the standard SD memory card, making it easy to carry
- Easy to use, plug and play

Specification

Item	Specification
Model	Team micro SDHC Class10
Capacity	8GB、16GB、32GB
Interface	SD2.0, SD3.0
Power source	2.7~3.6V
Reading / Writing	Read:17~20MB/Sec ; Write:10~14MB/Sec
Dimensions	11mm×15mm×1mm
Operation temperature	0°C ~ +70°C
Static temperature	-40°C ~ +85°C
Weight	1g
Warranty	Lifetime warranty
Write protect	Yes
Other explain	<ol style="list-style-type: none"> 1. *1GB=1,000,000,000 Bytes. In OS system, it would be displayed as 1,000,000,000 Bytes/1024/1024/1024 = 0.93GB 2. *Transmission speed will vary according to different hardware / software conditions, therefore the data can only used for basic reference.
