The first wireless charging product of Team Group – Zippy WA03 will solve all troubles above. Zippy WA03 utilizes WPC Qi wireless charging technology and specification, which is compatible with any Qi-enabled device. Charging a smartphone without cable is possible from now. With Zippy WA03, you could get rid of problems caused by the wire. Unlike many other products in the market, Zippy WA03 has large charging area comparing to other similar product, owing to Zippy WA03 unique 3-coils charging module design. Without specific charging position to align, you can charge your mobile device with dropping freely on the charging pad. Furthermore, you can quickly change from flat to stand charging mode by docking. It creates the flexible usage model for you to adjust the charging position according to your personal needs, for example, you can watch a movie while charging by landscape mode. Zippy WA03 is suitable for variety places, such as office, living room, bedroom, car, etc. Your phone will always be maintained at full power status, since your smartphone is charging all the time.

To live in a convenient, simple, safe, and wireless environment is what we dream of. So let Zippy WA03 bring you into the smart life!
