IMPACT™

IMPACT analysis software allows for quick reactions to on-going and emerging threats. Military and law enforcement units can use this powerful suite of information analysis capabilities to assist in collecting, linking and visualizing crime information. The flexible, scalable and affordable nature of IMPACT allows for usage by large enterprises and small teams alike.

DISSEMINATE
crime information

ANALYZE
data

IMPACT integrates easily with your team for quick adoption. Streamlined workflow with case-by-case access for users puts the information in front of the right people. The open architecture framework integrates with commercial software to expand system capabilities when and how you want. Personalized training brings your team up to speed and ensures full use of the system's capabilities.
