START YOUR MISSION

THE FUTURE OF COMMAND AND CONTROL

The iCommand suite provides an intuitive portrayal of the real-time operational environment. Drive the desired outcome for mission planning, real-time operations execution and after-action review, using the intuitive touch-screen user interface.

Link people, platforms and payloads in real-time

Collaborate across echelons

Drive decision making across domains

Merge and synchronize data

DISTRIBUTED COMMAND AND CONTROL

Use the cloud for secure information synchronization

Access data anywhere across the operational cloud

View the operational area in one common informational environment

Collect and store data securely across data centers

THIN CLIENT CAPABILITIES

Access information in real-time from any web-browser

No software or custom plug-ins required

HTML5 web application delivering 3D & touch-enabled experience

Seamlessly deliver critical information over the cloud
