TROY OfficeJet 8210 SecureUV Printer
H P   A u t h o r i z e d   •   T R O Y   E n h a n c e d

The TROY OfficeJet 8210 SecureUV Printer is a product that will enhance each user's ability to add security to every document that they print. Utilizing TROY's ultraviolet (UV) print technology, organizations can add a personalized layer of document authentication and fraud deterrence when printing with the OfficeJet 8210.

Benefits

Add Layered Security
Utilize Standard UV and SecureUV ink technology to add personalized, covert security features to any of your high value documents.

Low Operating Cost
Print your documents at lower cost per page than most laser printers, reducing long term consumable cost.

Features

Normal Light / UV Light

TROY Standard UV Ink
TROY Standard UV Ink adds a hidden UV agent to your black graphics or images. Standard UV ink is part of the black (K) cartridge. Everywhere that the black text or graphics are printed this invisible feature appears. The ultraviolet features are only detectable with a UV verification light, adding a protective layer of security to your documents.

Normal Light / UV Light

TROY SecureUV Ink
TROY SecureUV Ink provides an invisible layer of security to each of your documents. SecureUV ink is printed as either a designated text or graphic, but can only be detected with a UV verification light. This ink prints simultaneously with your black, cyan, and magenta ink cartridges allowing for a single pass through print.
General Specifications
