COMING Q4 2017
Smart 1-Line™
HMI COMPUTER
A complete modern solution for monitoring your AC-PRO® and/or AC-PRO-II® networks at one convenient location

The Smart 1-Line™ provides

☐ Turn-key monitoring solution designed for AC-PRO® & AC-PRO-II®

☐ Includes software for full Modbus communications capabilities

☐ Based on a rugged industrial computer with solid-state drive and no cooling fans

☐ Displays multiple substations

☐ Includes designer mode and run-time mode

☐ High resolution color touch screen

☐ Document, store, and access all of your breaker data at one location using built-in software for: Settings, Test Reports, Time Current Curves, Trending data, Trip History, Waveforms, and more.

☐ Can be custom configured by the user

☐ Display one line diagrams, waveforms, graphics, alarms, currents, power, and more.

☐ RS-485 communications to AC-PRO® & AC-PRO-II® Trip Units

☐ Ethernet communications to QT-Display-II™ (for AC-PRO-II®)

☐ Ethernet gateway for upstream HMI systems.

☐ Designed to be installed in a switchgear or control room with 1 or more low voltage line-ups

☐ Determine substation status at a glance

☐ Can be configured for remote breaker trip
