

TAPE CAST 99.6% CERAMICS NOW AVAILABLE IN LARGE GEOMETRIES AND THICKER THICKNESSES FROM VALLEY DESIGN

Valley's engineering and R&D teams have recently developed the capability to produce tape cast ceramics in large geometries both squares and rounds, and in thicker thicknesses than have previously been available in the market.

The ceramic is fired at our Shirley, Massachusetts facility, and are currently available:

- Squares and rounds up to 300mm and 450mm. Depending upon available firing oven size, up to 600mm or larger is possible.
- Thickness up to 4mm

If required, Valley can lap, polish, dice, drill or otherwise machine to your specifications.

Licensing opportunities are also available.
