

## DDS 4.0.1

### Hotfix 1

25<sup>th</sup> October 2004

#### Changes:

Description	Modification
<p>Support of GROUP import (as a workaround)</p> <p><i>DDS doesn't yet support the ASAP2 "GROUP" keyword directly (there is no corresponding 'group'-Entity in DDS). However, there is/was a workaround:</i></p> <ul style="list-style-type: none"> <li>• The ASAP2 export filter creates "GROUP" objects based on the DDS component- and/or software grouping.</li> <li>• The ASAP2 import filter creates component- and/or software grouping based on ASAP2 "GROUP" objects.</li> </ul> <p><i>This workaround is not supported in DDS version 3.0, 3.1 and 4.0.1. The version 2.3 is the last DDS version supporting this workaround.</i></p> <p><i>The workaround is now re-activated in Hotfix 1 of DDS 4.0.1.</i></p> <p><u>Note:</u> There is a new filter option 'CreateComponentAndSoftwareGrouping' which controls whether DDS should create the component- and software grouping or not. Default is: no creation of groupings</p>	<p>The files 'ImpA2.dll' and 'DDS.ini' in the DDS main directory are replaced with newer versions.</p>
