Spraying ideas from the market leader

WAGNER supplies innovative products featuring market leading technology to make your work easier and spruce up your home. Fine spray systems, manual spray guns, paint rollers, wallpaper strippers and steamers - we demand the highest standards from our products and work continuously to develop and enhance them.

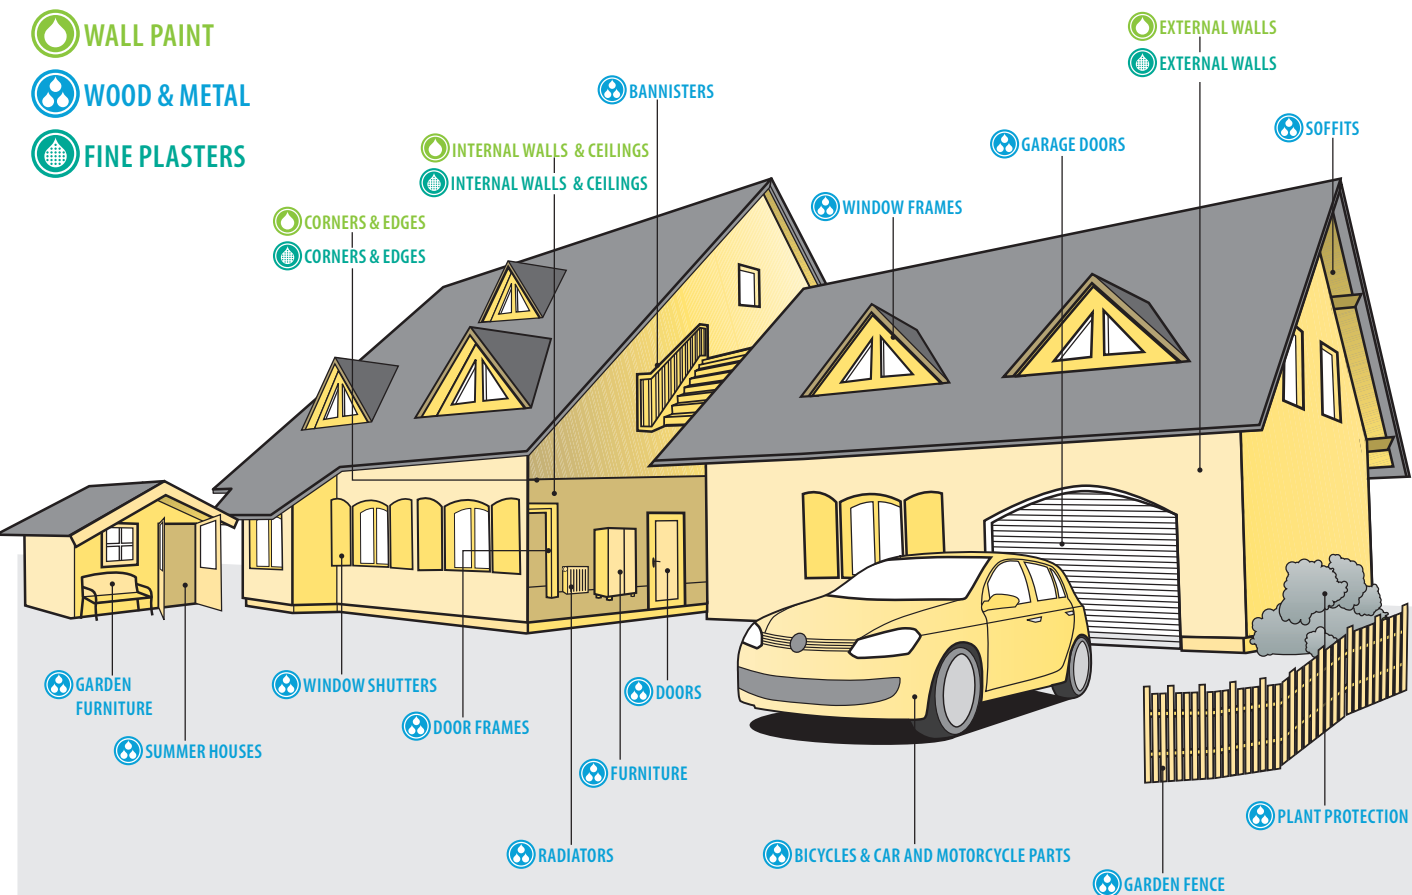

The WAGNER Group is the European market leader and stands for first class quality and pioneering technology. Using products, accessories and advice from WAGNER you can make your dreams for your house and garden come true easily and cost-effectively. No prior skills are required to produce professional results.

Are you planning to decorate or renovate your home? Do you want to protect your fences and garden furniture from the effects of the weather? Regardless of what you think deserves a new coat of paint, why not do it yourself? On the following pages you will find all the equipment you need to give walls, ceilings, wallpaper, windows, doors and furniture a new coat of paint to make them look lovely and to protect them. With little effort and professional results.

Wallpaper strippers

Don't waste anymore time.

Fine spray systems from WAGNER enable you to work much quicker than a brush and roller. The surface quality and coverage are visibly better with a noticeable time saving to get the job finished.

1 PRESERVING THE ORIGINAL SURFACE TEXTURE THROUGH INTELLIGENT PAINT APPLICATION

The key advantage of the spray process lies in the fact that it is a non-contact method of paint application. The texture of the original surface is left intact – in complete contrast to the results of manual application using a roller or brush.

When paint is applied to smooth surfaces manually with a brush or roller, the direct contact leaves visible traces due to the tool, such as roller outlines or brush marks on the surface. Spraying preserves the original texture even when working on textured surfaces such as Artex® or woodchip wallpapers.

SMOOTH SURFACE

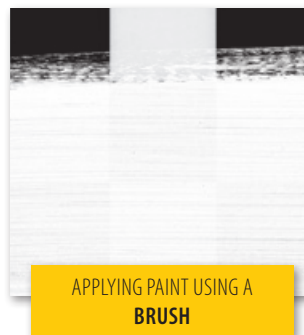

The coat is uneven. The surface characteristics are lost.

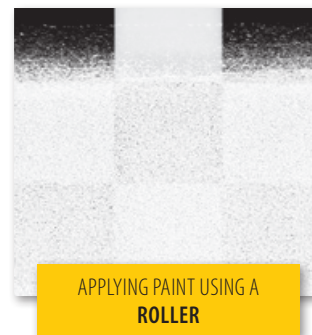

The coat is uniform and even. The surface characteristics are preserved.

2 GOOD COVERAGE

WAGNER paint spray systems guarantee a uniform perfect coverage of paint. Compared to rollers and brushes or even spray systems from other manufacturers, the results with WAGNER equipment are visibly better. At the end of the day you deserve the best possible surface finish.

APPLYING PAINT USING A
BRUSH

APPLYING PAINT USING A
ROLLER

APPLYING PAINT USING A
WAGNER SPRAYING SYSTEM

"Compared to the brush application, spray equipment achieves a sealed homogeneous surface after just one coat."

Confirmed by iLF (research and development company), Magdeburg

3 BETTER SURFACE QUALITY

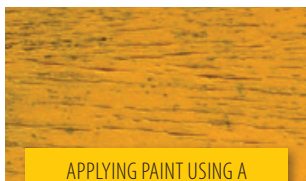

Fences, furniture and other objects which are exposed to the weather need protection: The sun, wind, rain, snow, high and low temperatures and moisture attack their surfaces. The right coating makes surfaces more resistant so that you can continue to enjoy them for as long as possible.

To establish which coating method offers the best added value for wood and metal, a series of tests using a range of common wood types was carried out in which the wood was coated using a conventional medium

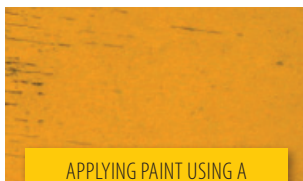

quality brush and the same materials were then coated with a WAGNER fine spray system. They were then left out in the weather. After a short time the coating on the wood which had been coated with the brush had started to break down completely. However the coating which had been applied with the paint spray gun was much more resistant.

APPLYING PAINT USING A
BRUSH

APPLYING PAINT USING A
WAGNER SPRAYING SYSTEM

4 WORK FASTER AND EASIER

WAGNER paint spray systems enable you to save time compared to working with a brush and roller. This is particularly noticeable on large surface areas but also when coating objects. On walls and ceilings there is no need to cut in corners and edges with a brush - instead the paint is applied quickly and evenly to achieve good coverage in a single coat. Edges and stripes caused by repainting with a roller are a thing of the past. Corners and areas which are difficult to access with a brush can be coated in record time with a precise adjustable paint jet.

APPROXIMATE TIME REQUIRED* FOR COATING

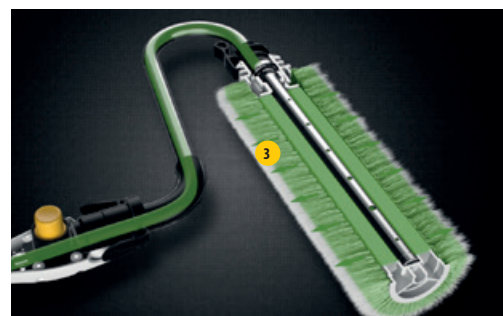

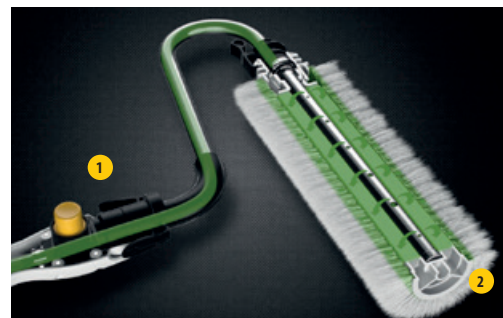

Object	Spray gun	4 cm brush or roller	Time saving
 Dresser	25 Min.	85 Min.	70%
 Window shutter	10 Min.	70 Min.	85%
 Room measuring 4 x 4 m:	15 Min.	58 Min.	75%

* Average time excluding preparation and cleaning.

Cleanly rolled.

If you definitely want to use a roller, look no further than WAGNER paint rollers. They allow you to work more quickly, cleanly and easily in comparison with conventional rollers. Forget the never-ending chore of dipping the roller in the tray and scraping off excess paint – because with our rollers, the paint is pumped directly into the roller, making drips and splashes a thing of the past.

The process is as follows: The user presses a button or presses a trigger (1) to pump paint into the roller frame where it is fed into the internal roller (2). There the paint is spread evenly into the pile fabric (3) thanks to the holes into the roller sleeve. As most of the paint is therefore not on the outside of the roller, there are no splashes or drips – unlike when using conventional rollers. For a clean and tidy paint experience!

Outstanding benefits WAGNER paint systems seal of quality

To provide more guidance the following contains information on our product symbols, seals of quality and technologies. They are repeated throughout the catalogue.

1 CLICK & PAINT SYSTEM – CHANGE EQUIPMENT IN SECONDS

Click & Paint features on all systems where the part that carries the paint can be removed from the turbine with a single click.

- Fast: Change paint and material in a instant
- Versatile: the perfect attachment for every job
- Simple: replace and clean the spray attachments

2 ATOMISATION POWER - THE FINENESS OF PAINT APPLICATION

What does atomisation power say about a system? In contrast to power consumption, atomisation is the effective energy available to atomise the paint. This is an indicator for the performance and possible uses of a spray gun. For example a spray system with lower atomisation power is sufficient for "coarser" work such as painting a fence, whilst "finer" work such as painting a piece of furniture requires a spray gun with higher atomisation power.

3 ADJUSTABLE PAINT JET - SUITABLE FOR ANY OBJECT

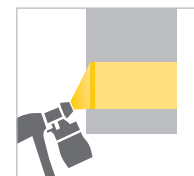

The paint jet can be adjusted to two or three different settings to tailor the jet precisely to the object you wish to coat.

vertical

round

horizontal

4 PERFECT SPRAY – THE ART OF SPRAYING

The seal of quality for simple, fast and effective paint application with perfect results by spraying. If a spray system bears the Perfect Spray symbol there is no need for complicated viscosity measurements. Simply thin the material by 10% if necessary and off you go - perfect results by spraying.

Perfect results for
wall paintPerfect results for
wood and metalPerfect results for fine
plasters and
textured paint

5 I-SPRAY TECHNOLOGY - HIGH PERFORMANCE NOZZLE

The innovative slotted nozzle for WallPerfect enables you to achieve:-

- Very fine atomisation for perfect finishes on all internal walls
- Simple distribution of viscous paints due to high viscosity tolerance
- Particularly high working speed

The high performance turbine will spray all conventional materials even without thinning

Good, uniform coverage in a single coat

Precision paint application in corners and on edges without the need for cutting in with a brush

Fast self-cleaning of the system

Fatigue-free work on walls and ceilings using the spray lance

The FineLiner allows corners and edges to be coated without masking

Battery operated – Paint is pushed through with the press of a button

Internally fed paint roller for non-drip application

Paint roller: suction system to draw paint straight from the container.

Direct suction from the paint container - no more refilling or topping up required

6 SPECIAL FEATURES

The WallPerfect systems have symbols to highlight the product features. So the special characteristics of the product can be easily seen.

Very little masking required - an envelope of air surrounds the paint jet

Apply textured paint with a grain size of up to 1mm

Fantastic results due to uniform paint application - even on difficult surfaces

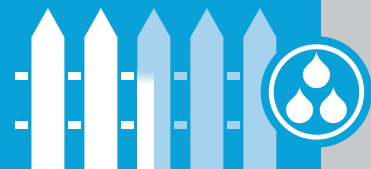

Fast working speed due to its high paint flow

WALL PAINT

WOOD & METAL

THE PERFECT PRODUCT FOR EVERY PROJECT

The following section lists all the devices that you can use for wall paints, gloss, enamels, varnishes and wood preservatives.

For each product, there is a table giving you an overview which will help you identify the specific spray system that is best suited for your project. The associated project sizes, product performance and special equipment available for the devices are also clearly shown.

FLEXIBLE AND VERSATILE FOR PROJECTS INSIDE AND OUT

Whether you want to go outside and paint or varnish your garden furniture or fences or stay inside and give the living room walls a fresh, new coat of paint: If you're looking for a spray system that covers the widest range of applications then the FLEXiO spray units or Airless Sprayer Plus are ideal for you.

These devices allow you to apply both low- and high-viscosity materials. This makes WAGNER's multipurpose spray units exceptionally versatile.

Whether you want to spray wall & ceiling, wood & metal or specialist paints – if you want a single tool to allow you to do a lot of different jobs then WAGNER's multipurpose FLEXiO spray systems or the Airless Sprayer Plus are the perfect choice.

Universal spray system *WallPerfect* FLEXiO 585

FLEXIBLE MANUAL SPRAY SYSTEMS FOR INSIDE AND OUT

If you are planning a slightly larger project and want to spray both internal walls and other surfaces, you need the FLEXiO 585 spray system. It's two spray attachments (for low and high viscosity materials) enable you to apply wall as well as wood and metal paints.

The powerful X-Boost turbine will handle all conventional materials without thinning using the innovative I-Spray nozzle. Even when you are spraying you can remain in control at all times: You can fully adjust the volume of air and paint. The spray jet can also be adjusted horizontally and vertically depending on the direction in which you wish to work, including a thin jet for wood and metal paints - for fast, perfect coverage. *WallPerfect* FLEXiO 585 is supplied in a handy carry case.

Universal spray system WallPerfect FLEXiO 687

THE UNIVERSAL PAINT SYSTEM FOR INTERIORS AND EXTERIORS

WallPerfect FLEXiO 687 gives you two paint spray systems for the price of one. The two spray attachments makes the system suitable for both interior and exterior use. Whether you want to spray internal walls or wood and metal paints - you will get fantastic results every time due to its uniform application even on difficult surfaces.

The innovative I-Spray attachment atomises paints perfectly and produces uniform, excellent coverage. The spray jet can be adjusted horizontally or vertically and the air volume adjustment is completely variable to suit your needs. The spray attachment for wood and metal even enables you to use a round jet - to ensure fast, perfect and precise application.

Universal spray system WallPerfect FLEXiO 867

THE POWERFUL SPRAY ALL-ROUNDER FOR INSIDE AND OUT

The powerful WallPerfect FLEXiO 867 is suitable for both inside and outside use. This is because the FLEXiO 867 includes two spray attachments: One specially for internal wall paints and a second for the application of wood and metal paints.

Working with the WallPerfect FLEXiO 867 is very straightforward. All the system functions can be controlled on the actual gun using the multi-function handle - even regulating the air volume. The innovative I-Spray spray attachment and the multi-adjustable spray jet ensure a fast, uniform coating and perfect coverage. Paint and lacquer are atomised perfectly and you work uniformly in every respect.

WallPerfect FLEXiO 867 is supplied in a handy carry case to keep the spray attachments and air hose tidy at all times.

Universal spray system *WallPerfect* FLEXiO 990

THE HANDY, CONVENIENT SPRAY SYSTEM FOR LARGE PROJECTS

The FLEXiO 990 can handle all water-based emulsions and latex paints thanks to its direct intake from the paint pot. Using the included spray attachment, it is also possible to work with water-based and solvent-based enamels, varnishes, wood preservatives and many other materials. Do you want to give your interior walls, doors, furniture or wooden decking a new coat of paint? Then the FLEXiO 990 is the perfect unit for you.

Thanks to the direct intake system, there is no need for any time-consuming decanting or refilling and the 7m-long material hose gives you ample working range to paint even large rooms without difficulty.

Thanks to the self-cleaning function, the pump unit and hose clean themselves in just a few minutes – so it's not just painting that is quick and easy, so is the cleaning up afterwards.

Airless spray system

Airless Sprayer Plus

THE ALL-ROUND DEVICE FOR DIY-ERS WITH VISION

Interior wall and latex paints or water-based and solvent-based materials such as enamels, varnishes, wood preservatives, cavity sealants, undercoats and stains – but not exterior paints – can all be sprayed without difficulty. Quickly, reliably and of course perfectly evenly.

The carrying handle allows you to easily change working location. Thanks to the Airless Sprayer Plus's 10-metre long hose, this airless device is able to reach high walls and ceilings as well as large structures such as garden sheds and carports without difficulty. As a result, the Airless Sprayer Plus is not just a powerful, versatile companion but also guarantees you an excellent surface finish and a large working range.

Project size	medium - very large ●●●●●
Special equipment	- 2 reversible nozzles (M for high-viscosity, XS for low-viscosity materials) - 2x M filters, 1x XS-S filter
Delivery rate	0,8 l/Min

Airless spray system ProjectPro 117

THE COMPACT MULTI-TALENTED SOLUTION FOR WALL, WOOD & METAL PAINTS

The ProjectPro 117 high-performance piston pump is the ideal companion for medium-sized through to very large-scale projects. Thanks to the wide range of materials and convenient suction system, you can perform a whole range of tasks comfortably and reliably. Any nozzle blockages can be eliminated quickly and easily thanks to the high-quality metal gun and reversible nozzle. This solution ensures trouble-free operation.

With its practical carrying handle and light weight, the ProjectPro 117 can be transported effortlessly and stored easily and conveniently.

Part number	0418 031

Airless spray system ProjectPro 119

THE MOBILE ALL-ROUND DEVICE FOR INTERIOR AND EXTERIOR USE

Thanks to the versatile ProjectPro 119 paint spray system, you are fully equipped for your large-scale projects. With its airless technology, the unit can spray all commercially available wood & metal paints, as well as emulsions and latex paints. It is, of course, efficient, reliable and robust, just like all other WAGNER products.

The top-quality metal gun with reversible nozzle for flawless finishes and the sturdy, wheeled-stand for ease of transportation between sites. The 15-metre delivery hose means that even high gables are easily reached.

ProjectPro 119 is therefore not only very powerful but also mobile and suitable for a wide range of uses.

Project size	medium - very large ●●●●●
Special equipment	- lightweight metal gun - adjustable pressure control - 15 m paint hose - folding stand

THE PERFECT PRODUCT FOR EVERY PROJECT

All the products listed in this section have been specially developed for applying wall paint.

Each product has a chart to enable you to decide which wall paint system would be best for your project. The project size may be small or large, the capacity and special equipment for the system are clearly shown.

WALL PAINT

GET IT ON THE WALL! SPRAY ONCE RATHER THAN BRUSHING X TIMES

Regardless of whether you are just moving in or it's simply time for a new coat of paint - ideally you want the job to be completed quickly, be enjoyable and above all produce perfect results.

With WAGNER you can do all three. Our innovative paint systems for emulsion and internal wall paint applied either by sprayer or roller with integrated reservoir. No more brush hairs in the paint, no drips or mess, no bending or stretching and above all - excellent results.

In just one coat you can achieve uniform coverage with our wall paint spray systems to save you having to complete a second or even a third coat including waiting for the drying time.

It enables you to make your dreams come true. Have fun with it - and get that paint onto the wall.

Wall paint spray system *WallPerfect W 665*

THE CLASSIC PAINT SPRAY SYSTEM FOR INTERNAL WALLS

Brilliant white, stunning colours or interesting focal points? Make your renovation and decorating ideas a reality with the incredibly easy to use classic W 665 wall paint spray system. The innovative I-Spray attachment atomises paints perfectly and produces excellent coverage very quickly.

The paint volume is fully adjustable. The spray jet can also be adjusted horizontally or vertically depending on which direction you prefer to work. It is very simple to handle, you just hold the spray attachment in your hand whilst the turbine stays on the floor or over your shoulder (strap supplied).

Paint roller WallPerfect PowerRoll System

A VERSATILE SOLUTION FOR LARGE AND SMALL AREAS

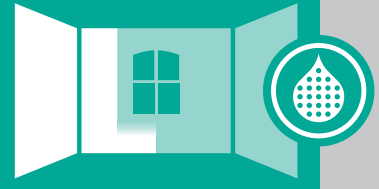

Are you planning a big project and would prefer to use a roller rather than spraying? You don't have to miss out on comfort, convenience and innovative technology. At the touch of a button, the powerful electric PowerRoll system pumps the paint directly from the paint tin into the roller. Allowing you to set your own working pace for walls, ceilings, corners and edges. No more drips and mess! The high delivery rate and long hose help you to roller paint even on large surfaces and exterior walls both quickly and professionally.

The PowerRoll system is supplied with a range of practical accessories: a second paint roller and an adapter for standard extension pieces to comfortably increase your working height for ceilings. The edge plate on the FineLiner attachment, also supplied, allows you to paint edges precisely - with absolutely no masking! Cleaning the system also takes care of itself at the touch of a button.

FINE PLASTERS & TEXTURED PAINTS

GET THAT PLASTER ON! SPRAY ON TEXTURE AS WELL AS COLOUR.

Walls that are silky-smooth to the touch or vibrant textures - it's a matter of taste. Whatever you choose, the visual effect has to be right. This determines whether you truly feel at home within your own four walls.

However achieving a top-quality finish with today's modern decorative plasters using a brush and roller is no easy task. If you want to ensure successful results right from the start, choose the newly developed *TexPerfect FLEXiO 525* spraying system developed specially for decorative plasters and textured paints, or a high-performance *WAGNER* paint spraying system combined with the *TexPerfect* spraying attachment accessory. With *TexPerfect*, you spray the material directly onto the wall to create a consistent even finish on edges and in corners. A great result that you can be proud of.

Spray like a professional - professional results thanks to *TexPerfect*.

UNIFORM APPEARANCE

Sprayed fine plasters and textured paints provide a much more uniform finish than can be achieved using a roller. The use of spray equipment eliminates the formation of clumps on wall surfaces. It also prevents the appearance of different surface textures at corners and edges.

APPLYING PLASTER USING A
BRUSH

APPLYING PLASTER USING A
WAGNER SPRAYING SYSTEM

Textured paint spraying system *TexPerfect* FLEXiO 525

A HIGH-PERFORMANCE MANUAL SPRAYING UNIT FOR DECORATIVE PLASTERS AND TEXTURED PAINTS

Would you like to coat your walls with evenly applied and streak-free textured paint? Then the *TexPerfect* FLEXiO 525 is just what you're looking for. Its specially developed nozzle allows you to apply decorative plasters and textured paints with a grain size of up to 1 mm.

The powerful turbine and adjustable paint jet ensure precise and comfortable working, even on corners, edges and ceilings. Save material as well as time - *TexPerfect* FLEXiO 525 ensures efficient coverage of internal and external walls.

WOOD & METAL

GET THAT COATING ON! SIMPLE AND PERMANENT PROTECTIVE COATINGS

Many objects outside the house must be regularly protected from the weather as well as wood and metal inside your home. So whether it is a garden fence, a bannister, window shutters, furniture, doors or radiators - recoating is a lot of work and it's hardly a pleasure with a brush. Fortunately there are WAGNER's spray systems.

Fine spray systems and manual spray guns win hands down over brushes when it comes to the application of wood and metal paints. They enable you to work much quicker and can also reach difficult to access areas such as corners and edges. You can achieve smooth, homogeneous surfaces in a single coat. The excellent coverage means that spraying your items provides them with much better protection against the weather.

That means you can make your home gleam like new in no time and you will enjoy every minute of it.

THE PERFECT PRODUCT FOR EVERY PROJECT

In this section we show you all the systems we can supply for the perfect application of gloss, lacquers, varnishes, wood preservatives and oils.

Each product has a table to enable you to decide which spray system would be best for your project. The project size may be large or small, the capacity and special equipment for the system are shown in a clear concise format.

Fine spray system W 550

THE HANDY SOLUTION FOR SMALL AND MEDIUM PROJECTS

The time-tested W 550 fine spray system is ideal for windows, fences, furniture etc. The atomisation power provides good coverage and precision regardless of the material used, whether it is lacquer, varnish or wood preservative. You therefore achieve a fast, perfect finish in any position and in any working direction, even when spraying objects beneath you or working above your head.

Fine spray system W 600

THE PERFECT SOLUTION PARTICULARLY FOR WOODEN SURFACES

WoodPerfect W 600 is the perfect way of coating wooden objects with enamels, varnishes, oil-based products or wood preservatives. Whether you are coating a wooden fence, timber decking or your garden shed: The fully adjustable paint volume ensures that you always achieve perfect, uniform coverage. The spray jet can be adjusted to be horizontal or vertical or can be round to guarantee the perfect result, whatever the project.

Project size	small - medium ●●○○○

WALLPAPER STRIPPERS

OFF WITH THAT OLD PAPER! REMOVE WALLPAPER EASILY AND WITHOUT HARMING THE ENVIRONMENT

You may be looking forward to a change of wallpaper - but before you can hang your new design you have to get rid of the old paper. That can be a real nuisance if you have not yet come across our wallpaper strippers which prevent you from having to wet the walls and scrap off all the old paper.

WAGNER wallpaper strippers not only save you time but also protect your health and the environment - all our systems use steam with no chemicals at all. The lightweight steam plates make your work on the wall very simple and the standard Power Steam Control automatic cut-out prevents overheating - keeping you safe. Allowing you to replace your tired old wallpaper with a fresh new look in a flash.

THE PERFECT PRODUCT FOR EVERY PROJECT

Each product has a table to enable you to decide which wallpaper stripper would be best for your project. The project size may be large or small, the capacity and special features of the products are clearly shown.
