DESCRIPTION

The CV series consists of non-isolated DC/DC converters that can deliver up to 3A of output current in a small open frame package. This series features remote on/off, adjustable output voltage, and efficiency up to 95%. These converters are protected against over current, over temperature, and short circuit conditions. The CV series is RoHS compliant and has UL60950-1, EN60950-1, and IEC60950-1 safety approvals. This series also has positive and negative output applications as well as vertical (standard) and horizontal ("A" suffix) SIP mounting options.

NOTES

- Output voltage programmable from 0.6V to 3.3V, 0.59V to 6.0V, 3.0V to 6.0V, and 5.0V to 15V by connecting a single resistor between the TRIM and GND pins of the module. To calculate the value of the resistor (R_{trim}) for a particular output voltage (V_o), use the equations shown in **Table 1**.
- CV12S3.3-3000: When using negative output application, $|V_o|$ trim up > 3.3V and the output current is 1.5A max.
- CV12S3.3-3000: When $V_{o,set} < 0.9VDC$ the input voltage range is 4.5 ~ 9 VDC.
- Both vertical mounting and horizontal mounting SIP types are available. Add the suffix "A" to the model number for horizontal mounting SIP type.
- CAUTION: This power module is not internally fused. An input line fuse must always be used.**

**Due to advances in technology, specifications are subject to change without notice.*
