

Varitector High Density Surge Protection

NEW

Weidmuller's Varitector range offers low-cost, high-density surge protection options for lightning and other transient protection in industrial control equipment. UL (497B) approved, Varitector is ideally suited for signaling (I/O) applications such as analog current and voltage loops, DC and AC status signals and a wide variety of serial interface and telephone network installations. Models for hazardous area and SIL options are available.

The Varitector range includes two construction formats, VSSC and VSPC. VSSC models feature 4- or 6-pole rugged, compact terminal-sized housings. VSPC models feature a two part, plug-and-base format for easy arrestor replacement without re-wiring. Both formats are DIN-rail mounted, rated for discharge currents up to 20kA (8/20μs), and provide a combination of wire-to-ground and wire-to-wire protection.

All Varitector models include high quality field connections and are grounded via the DIN-rail. A combination of gas discharge tubes, varistors and suppression diodes in single or multi-stage configuration are used to protect nominal voltages between 5 VDC and 230 VAC.

Status monitoring options help ensure continued protection. VSPC modules feature local and remote signaling of arrestor status, while many of the VSSC models have an option for an integral LED, which signals when module replacement is required.

The Varitector range complements the Weidmuller's SPD II range of surge protectors for low voltage power distribution applications. Taken together, these products provide extensive DIN-rail mounted surge protection capability for industrial installations.

Features:

- Two formats – high density terminal (VSSC), or pluggable, replaceable arrestor (VSPC)
- $I_{max} = 20\text{kA}$ (8/20μs)
- Local or remote indication options for arrestor status
- Grounding via DIN-rail or field connection
- UL497B approval
- Color coded line voltage identification
- Accessories include test meter and EMC Set (easy shield connector)

Weidmüller

VARITECTOR SPC

Pluggable surge protection for the measurement and control industry VARITECTOR SPC

Weidmuller's VARITECTOR SPC pluggable surge protection is remarkable for its combination of extremely high protective functionality and compact dimensions. It is suited for use in measurement and control circuits. The size is made possible by the selection of INSTA dimensions, with a width of 17.8 mm (1TE).

Two versions are available:

- VSPC: a surge protector with no monitoring function
- VSPC R: a surge protector with monitoring function

The base components are plugged in to form a direct earthing contact via the mounting rail. Thus you save time during the connection. The VARITECTOR SPC series is optimally designed for compact installation locations in process automation, industrial automation or building automation. The two-stage surge-protection base components are equipped with gas discharge tubes, suppressor diodes (TVS) and decoupling components. Individual protective components (such as gas-filled spark gaps, varistors and suppressor diodes) supplement this product line. IEC 62305 requires that a periodic inspection of surge protection products be conducted. The functionality of all VARITECTOR SPC modules can be tested using testing equipment (such as the V-TEST Basic) that is available separately. The VARITECTOR SPC R modules also feature an internal monitoring function. The green LED signals when the protection function is ready. The red LED signals an error. VARITECTOR SPC Up to

ten modules can be wired together in series. The modules alert an evaluative module (the VSPC CONTROL UNIT) in the event of an error. VARITECTOR SPC-series surge protection is available with rated voltages of 5 V, 12 V, 24 V, 48 V and 60 V. The product's voltage level is Color-coded on the pluggable arrester. An earthing contact is established by snapping onto an earthed TS35 rail. The TS35 must be earthed in order to ensure safe power discharging via the terminals of up to 20 kA (8/20 µs) and 2.5 kA (10/350 µs). The rail must be screwed onto the earthed mounting plate for reasons of EMC. In order to optimize the protective function, a PE-contact connection should be made over the VSPC module every 60 cm for equipotential bonding. The pluggable protective element can be pulled out during operations without interrupting the measurement circuit. A testing instrument, available as a Weidmuller accessory, allows you to test the protective element in compliance with the IEC 62305-3 directive. The accessory also includes a simple mechanism for applying the wire shield.

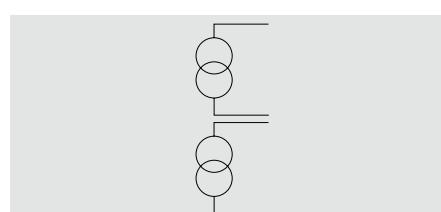

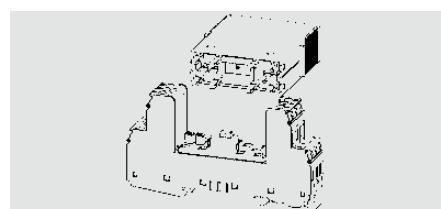

Overview of model types

A VARITECTOR SPC (VSPC) consists of a **pluggable component** and a **separate base component (VSPC BASE)**.

Explanation of terms:

CL = current loop / analog signals

SL = symmetric loop - for binary signals

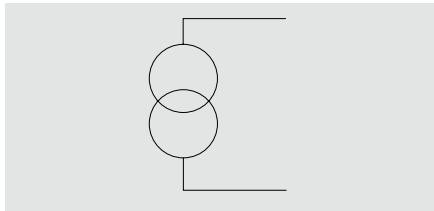

VSPC 2CL (CL = current loop) is a two-stage protective combination with a gas discharge tube and a suppressor diode located between the current paths. This VSPC 2CL limits the surge voltage within **two analog signal circuits** (such as for current loops). This pluggable component can be inserted into the base (VSPC BASE 2CL). The base (VSPC BASE FG 2CL) is used when working with signal circuits which are not earthed. The VSPC 2CL HF is used in order to avoid influencing high-frequency signal circuits (this also includes the VSPC RS485 and the VSPC UK0). This protective combination is also inserted into the base mentioned above.

Monitoring function

The **VSPC 2CL R** products feature monitor and alert functions. Despite the alert function, there are still two channels

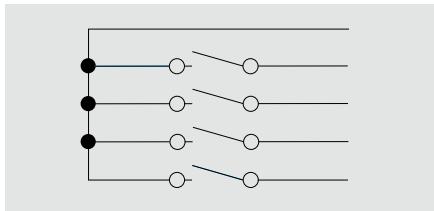

available for current loops in a single housing. The special VSPC BASE 2CL R and VSPC BASE 2CL FG R bases transfer the alert function to a 2-pole screw/plug-in connection in the bases and to the VSPC CONTROL UNIT.

The **VSPC 1CL** is a two-stage protective combination with a gas discharge tube and a suppressor diode located between the current paths. This VSPC 1CL limits the surge voltage within **one analog signal circuits** (such as for current loops). This pluggable component can be inserted into the base (VSPC BASE 1CL). The base (VSPC BASE FG 1CL) is used when working with signal circuits which are not earthed.

Monitoring function

The **VSPC 1CL R** products feature monitor and alert functions. All channels remain despite the alert function. The special VSPC BASE 1CL R and VSPC BASE 1CL FG R bases transfer the alert function to a 2-pole screw/plug-in connection in the bases and to the VSPC CONTROL UNIT.

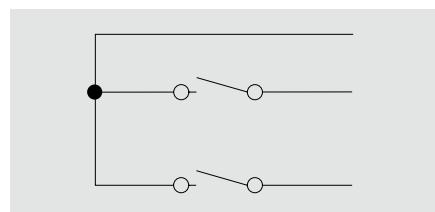

The **VSPC 4SL** is a two-stage protective combination with a gas discharge tube and a suppressor diode from the current

path to the PE. This VSPC 4SL limits the surge voltage within **four binary signal circuits** (such as for alert contacts). This pluggable component can be inserted into the base (VSPC BASE 4SL). The base (VSPC BASE FG 4CL) is used when working with signal circuits which are not earthed.

Monitoring function

The **VSPC 4SL R** products feature monitor and alert functions. Despite the alert function, there are still channels available for the four binary signal circuits in a single housing. The special VSPC BASE 4SL R base transfers the alert function to a 2-pole screw/plug-in connection in the base and to the VSPC CONTROL UNIT.

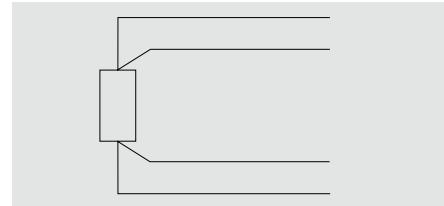

The **VSPC 2SL** is a two-stage protective combination with a gas discharge tube and a suppressor diode from the current path to the PE. This VSPC 2SL limits the surge voltage within **two binary signal circuits** (such as for alert contacts). This pluggable component can be inserted into the base (VSPC BASE 2SL). The base (VSPC BASE 2CL FG) is used when working with signal circuits which are not earthed.

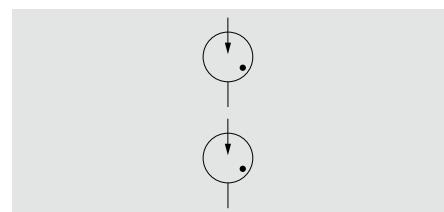

Monitoring function

The **VSPC 2SL R** products feature monitor and alert functions. Despite the alert function, there are still channels available for the two binary signal circuits in a single housing. The special VSPC BASE 2SL R base transfers the alert function to a 2-pole screw/plug-in connection in the base and to the

VSPC CONTROL UNIT.

The **VSPC 3/4WIRE** is a two-stage protective combination with a gas discharge tube and a suppressor diode from the current path to the GND. This VSPC 3/4WIRE limits the surge voltage within four temperature-measurement circuits (such as for DMS or PT100/100 sensors). For non-earthed measurement circuits, we recommend using the base (VSPC BASE FG 4CL).

VSPC MOV 2CH , VSPC TAZ 2CH und VSPC GDT 2CH

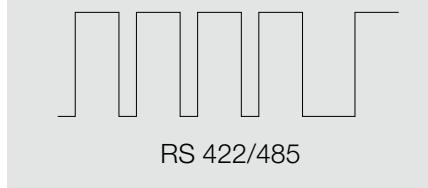

Four cables can be protected with the 2CH modules. By wiring the connections differently, either two no-voltage signal lines or four binary signal lines can be protected. Two three-pole gas discharge tubes (GDTs) are used for the VSPC GDT 2CH. This universal protective circuitry limits the voltage between the signal lines and also between each signal line and the PE.

The VSPC MOV 2CH and TAZ 2CH offer one-stage protection with a varistor (MOV) or suppressor diode (TAZ or TVS) between the current paths. This makes it possible to protect a no-voltage (floating) signal circuit. Two binary signal circuits can also be protected if terminals 1 and 7 are assigned to GND / PE. These VSPC pluggable components are inserted into the base (VSPC BASE 2/4CH). The base (VSPC BASE 2/4CH FG) is used when working with signal circuits which are not earthed..

24 V

The **VSPC RS485** is a two-stage protective combination with a gas discharge tube and a suppressor diode located between the current paths. This VSPC RS485 limits the surge voltage within **two high-frequency signal circuits**. This pluggable component can be inserted into the base (VSPC BASE 2CL). The base (VSPC BASE FG 2CL) is used when working with signal circuits which are not earthed.

Monitoring function

The VSPC RS485 R product features monitoring and alert functions. Despite the alert function, there are still two channels available for current loops in a single housing. The special VSPC BASE 2CL R and VSPC BASE 2CL FG R bases transfer the alert function to a 2-pole screw/plug-in connection in the bases and to the VSPC CONTROL UNIT.

Earthing unit and test plug

The earthing unit can be used during installation to short out the connected wires to earth. The earthing unit is swapped out for a VSPC pluggable component before the initial commissioning. The test plug has 2.3 mm sockets. These sockets can be used by a meter to check the connected measurement circuit..

VSPC 1CL PW (power and signal 1CL)

offers combined protection that is suitable for the 24 VDC power supply and the current loops within a device.

This VSPC protects sensors with an additional 24 VDC.

Applications

The pluggable INSTA housing was created in compliance with DIN 43880. It consists of a lower section (the VSPC BASE) and a pluggable component (the VSPC). The VSPC BASE is made from black PA6.6 V0. The pluggable component is made from red PA6.6 V0. The temperature range is from -40 °C to + 70 °C. The VSPC series has been tested to comply with IEC 61643-21 04/2008 and EN 61643-21. Modules were tested with categories C1, C2 and C3: with quick-rising edges with up to 300 pulses. Category D1 describes high power testing (10/350 µs), so that the VSPC can be used according to IEC 62305-4. The base and pluggable components are Color coded according to the voltage level. This makes installation easier.

Color coding

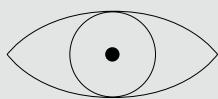

The pluggable components transfer their coding to the base element when they are plugged in for the first time. The voltage levels are also labelled with Colored Dekafix markers applied to the VSPC pluggable component. This gives you a better overview within the electrical cabinet.

Voltage level	Color
≤ 12 V	green
24 V Binary	blue
24 V Analog	yellow
48 V	red
≥ 60 V	violet
Special function	white

Test possibility / V-TEST

Because the modules are pluggable, it is possible to test the VSPC visually or by using a V-TEST BASIC testing device. The VSPC can be easily tested; the user needs only to insert the VSPC pluggable component into the V-TEST BASIC. The result is then shown on the display. The VSPC R modules also feature an internal monitoring function for the arrester. An error is displayed at the defective module. The VSPC CONTROL UNIT can then transfer an alert to the control room.

Reoccurring tests / V-TEST

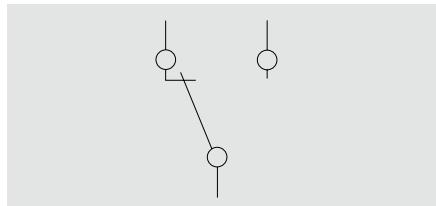

Monitoring

The IEC 62305-3 requires testing and maintenance for lightning protection systems. This includes the testing of the arresters used in the system.

Class of protection	Interval for complete testing	Interval for visual inspection
I	2 years	1 year
II	4 years	2 years
III/IV	6 years	3 years

Caution! These periodic inspections may be extended with stricter requirements pertaining to special applications or regions.

Remote error diagnostics

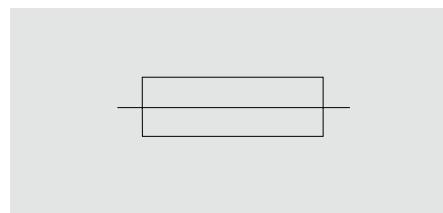

When the VSPC module labelled "R" is inserted into the corresponding "R" base component, it is then possible to use the outage alert function via a two-pole plug. This screw/plug-in connection has a clamping range from 0.5 to 1.5 mm². The wire stripping length is 6 to 6.5 mm. A screwdriver with a 2 mm blade width is used to turn the screw. The VSPC Rs are connected in series to the VSPC CONTROL UNIT evaluative module. Up to ten VSPC Rs can be connected in series to the VSPC CONTROL UNIT. The evaluative module is supplied with 24 VDC. It is then responsible for the switching and for the voltage supply to the VSPC modules. A no-voltage (floating) CO contact can then be used to alert in the event of an outage. The error is also displayed directly on the module when the LED changes Color from green to red. An automatic reset is carried out by the VSPC CONTROL UNIT within one minute after the failed VSPC pluggable component is replaced.

Installation

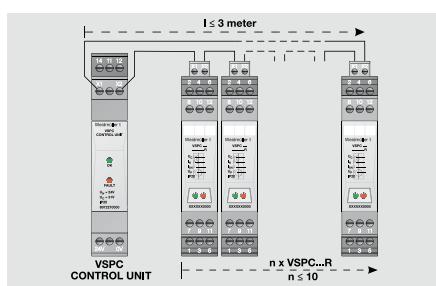

The VSPC series is appropriate for protecting signal circuits. In order to achieve a complete protective strategy for the facility, the power feed must be protected against Class-II surge voltages (for example, by using the PU II series). For existing lightning protection facilities, Class-I protection must be used (for example, by using the PU I series). Class-II protection (for example, the PU II) is sufficient when there is no lightning protection facility.

Fusing

The VSPC surge protection modules are designed so that they are decoupled between the individual protective stages. The following must be observed when providing fuse protection externally:

- Max. rated current
- Deratings curve
- Type of installation
- Application

Discharge capacity

Testing is conducted using voltage and current pulses according to the IEC 61643-21 standard concerning surge protection in networks which process signals.

Category	Testing pulse	Surge voltage	Surge current	Pulse Type	
C1	Quick-rising edge	0.5 - 2 kV with 1.2/50 µs	0.25 - 1 kA mit 8/20 µs	300	Surge voltage arrester
C2	Quick-rising edge	2 - 10 kV with 1.2/50 µs	1 - 5 kA mit 8/20 µs	10	Surge voltage arrester
C3	Quick-rising edge	≥ 1 kV with 1 kV/µs	10 - 100 A mit 10/10000 µs	300	Surge voltage arrester
D1	High power	≥ 1 kV	0.5 - 2.5 kA mit 10/350 µs	2	Arrester for lightning current and surge voltages

Category C reflects the interference pulses with quick-rising edges and minimized power. Category D uses quick-rising edges and high power to detail the interference pulses. This energy simulates the high-power load that stems from coupled partial lightning currents.

General technical data

Storage temperature -40 °C...+80 °C
Operating temperature: -40 °C...+70 °C
Air humidity 5%...96% RH with no condensation
Material: V0, IP20

Connection: screw connection
screwdriver blade: 0.6 x 3.5 DIN 5264
(for example, 0.6 x 3.5 x 200, Part No. 9010110000)
rated torque: 0.5 Nm
max. torque: 0.8 Nm
stripping length: 7 mm
solid: 0.5...4 mm²
flexible: 0.5...2.5 mm²
wire-end ferrule with plastic collar:
0.5...2.5 mm²

Remote signalling connection:
screw connection
screwdriver blade: 0.4 x 2.0 DIN 5264
(for example, SD 0.4 x 2.0 x 60, Part No. 9037160000)
max. torque: 0.2 Nm
stripping length: 6...6.5 mm
solid: 0.5...1.5 mm²

Dimensions

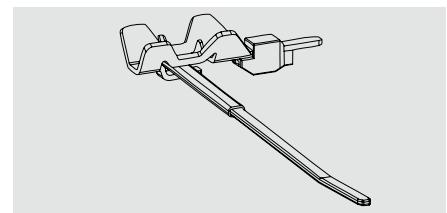

length : 90 mm
length with remote signalling contact:
98 mm
height: 69 mm
width: 17.8 mm

Accessories**Markers**

The VSPC BASE lower section can be labelled with Dekafix-5 markers. The VSPC pluggable modules are Color coded with Dekafix-5 markers according to their rated voltage.

Shield connection

EMC SET, order number 1067470000
The EMC set consists of a connection component with shielding and a cable tie covered with shielding braid. The RT-1 cable tie tool (order number 1296000000) can be used to fasten the cable ties professionally.

**V-Test**

Testing device for functional tests of the pluggable VSPC, PU II and PU I surge protection.

This tables contains recommendations for the choice of device. Our technical consultants will be glad to assist you with your individual requirements.

VARITECTOR SPC

VSPC 1CL – Protection for one analog signal

- Optional monitoring function with status indicator and alert function
- Pluggable arrester (plug-in / disconnect interruption-free and impedance neutral)
- Testable with V-TEST instrument
- Version with non-earthed PE connection for avoiding potential differences
- Usable in accordance with installations standard IEC 62305
- Integrated PE contact in base element, safely discharges up to 20 kA (8/20 µs) and 2.5 kA (10/350 µs) to PE

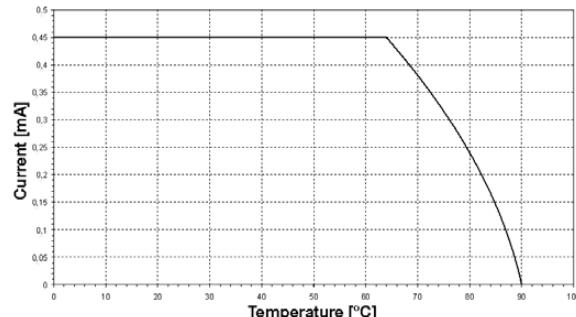

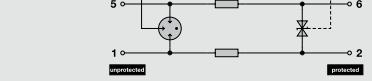

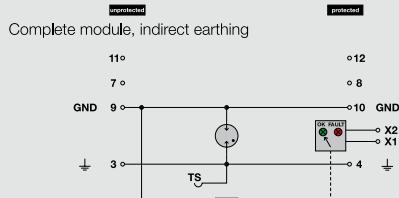

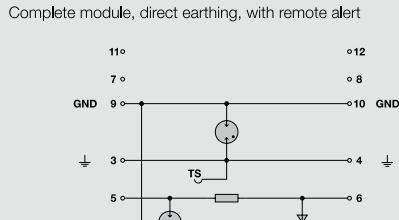

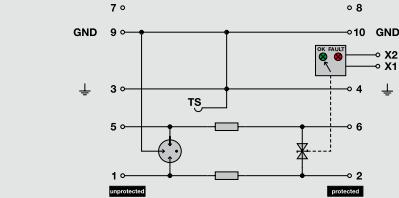

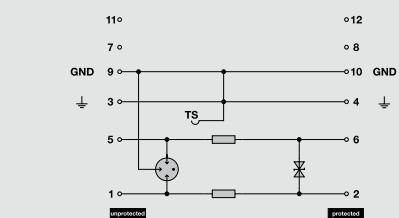

Technical Data

for all VSPC 1CL

Dielectric strength with FG against PE	> 500 V
Volume resistivity per path	2.2 Ω
Oversstroked fault mode	Mode 2
Requirement category acc. to IEC 61643-21	C1; C2; C3; D1
Surge strength C1	< 1 kA / 8/20 µs
Surge strength C2	5 kA / 8/20 µs
Surge strength C3	100 A / 10/1000 µs
Surge strength D1	1 kA 10/350 µs
Rated discharge current I_N (8/20 µs) wire-wire / wire-PE / GND-PE	2.5 kA / 2.5 kA / 2.5 kA
Rated discharge current I_{max} (8/20 µs) wire-wire / wire-PE / GND-PE	10 kA / 10 kA / 10 kA
Lightning test current, $I_{imp.}$ (10/350 µs) wire-wire / wire-PE / GND-PE	2.5 kA / 2.5 kA / 2.5 kA
Type of connection	Pluggable in VSPC BASE
Storage temperature	-40 °C...+80 °C
Ambient temperature (operational)	-40 °C...+70 °C
Rel. humidity	5 %...96 % RH
Degree of protection	IP20

Approvals

UL Listed (USL). Assessed to UL497B. File ref. E 311081

Dimensions of complete module (arrester + base element) Without telecomm. contact With telecomm. contact (R)
Length x width x height 90 x 17.8 x 69 mm 98 x 17.8 x 69 mm
Note

- Testable with V-TEST instrument
- Space-saving design with optional signaling contact, without additional space requirements
- High transmission rates with low attenuation values
- Usable in accordance with installations standard IEC 62305
- Integrated PE contact in base element, safely discharges up to 20 kA (8/20 µs) and 2.5 kA (10/350 µs) to PE

Technical Data

for all VSPC 2CL HF

Dielectric strength with FG against PE	> 500 V
Rated current	450 mA
Volume resistivity per path	2.2 Ω
Oversstroked fault mode	Mode 2
Requirement category acc. to IEC 61643-21	C1; C2; C3; D1
Surge strength C1	< 1 kA / 8/20 µs
Surge strength C2	5 kA / 8/20 µs
Surge strength C3	100 A / 10/1000 µs
Surge strength D1	1 kA 10/350 µs

Rated discharge current I_{DN} (8/20 µs) wire-wire / wire-PE / GND-PE 2.5 kA / 2.5 kA / 2.5 kA

Rated discharge current I_{Dmax} (8/20 µs) wire-wire / wire-PE / GND-PE 10 kA / 2 x 10 kA / 10 kA

Lightning test current, I_{Limp} , (10/350 µs) wire-wire / wire-PE / GND-PE 2.5 kA / 2.5 kA / 2.5 kA

Degree of protection IP20

Type of connection Pluggable in VSPC BASE

Storage temperature -40 °C...+80 °C

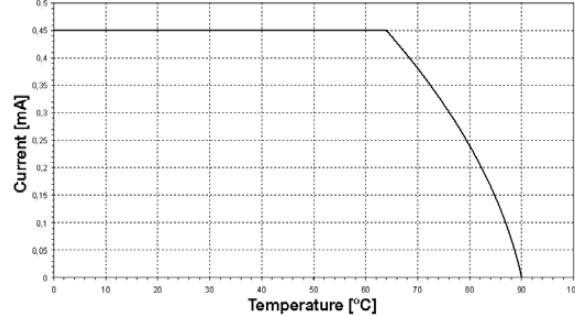

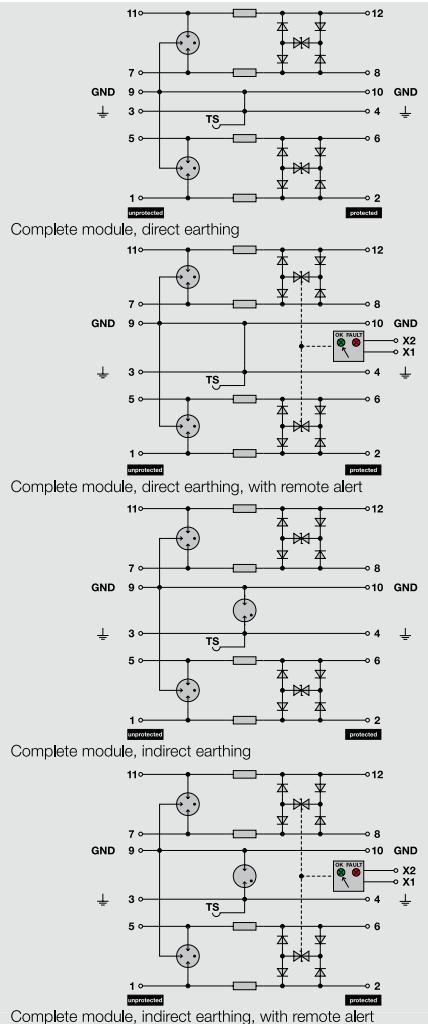

Ambient temperature (operational) -40 °C...+70 °C

Rel. humidity 5 %...96 % RH

VSPC Accessories**V-Test**

- Instrument for testing the protective functions of series: PU I, PU II and VSPC
- Device for realizing standard IEC 62305 (periodic testing)
- Handy device with integrated battery set for local measurements
- Result display via LCD display
- Bilingual menu
- Including protective bag and power supply
- Intuitive user navigation in German and English

The V-Test is a compact, portable instrument for the Varitector SPC pluggable surge protection (VSPC series) and surge protection for power distribution, PU I and II series. With this instrument, the Weidmuller surge protection can be tested for protective function in accordance with the required test periods as stipulated by IEC62305 (DIN VDE 185 Part 3). In a backlit display, the measurement result is indicated with "ok" or "not ok" for each component.

**Technical Data**

Rated voltage	100...240 V AC
Accumulator set	8 NiMH with 2600 mA
Storage temperature	0 °C ... 40 °C
Ambient temperature (operational)	0 °C ... 40 °C
Degree of protection	IP20
Measuring range	U < 1000 V / I = 1 mA
UL94 flammability class	V0

VARITECTOR SPC

VSPC 1CL EX – Protection for an analog signal in intrinsically safe circuits

- Pluggable arrester (impedance neutral plugging/unplugging without interruption)
- Can be tested with the V-TEST testing device
- Space-saving design for 1 analog signal
- Version with floating ground PE connection used to avoid differences in voltage potential
- Can be used in compliance with the IEC 62305 installation standard
- Integrated PE contact in base element, safely discharges up to 20 kA (8/20 µs) and 2.5 kA (10/350 µs) to PE
- Can be used in zone 2, 1 and 0
- Certified for IEC 61643-21:08 D1, C1, C2, C3

Complete module, floating ground

VSPC 4SL EX – Protection for four binary signals in intrinsically safe circuits

- Pluggable arrester (impedance neutral plugging/unplugging without interruption)
- Can be tested with the V-TEST testing device
- Space saving design for 4 binary signals
- Version with floating ground PE connection used to avoid differences in voltage potential
- Can be used to comply with the IEC 62305 installation standard
- Integrated PE contact in base element, safely discharges up to 20 kA (8/20 µs) and 2.5 kA (10/350 µs) to PE
- Can be used in zone 2, 1 and 0
- Certified for IEC 61643-21:08 D1, C1, C2, C3

Complete module, floating ground

Technical Data Arresters / Plugs

General data

Volume resistivity	4.7 Ω
Overstressed fault mode	Mode 2
Requirement category acc. to IEC 61643-21	C1; C2; C3; D1
Surge strength C1	< 1 kA / 8/20 µs
Surge strength C2	5 kA / 8/20 µs
Surge strength C3	100 A / 10/1000 µs
Surge strength D1	2.5 kA / 10/350 µs
Rated discharge current I_{tr} (8/20 µs) wire-wire / wire-PE / GND-PE	2.5 kA / 2.5 kA / 2.5 kA
Rated discharge current I_{max} (8/20 µs) wire-wire / wire-PE / GND-PE	10 kA / 10 kA / 10 kA
Lightning test current, I_{L} (10/350 µs) wire-wire / wire-PE / GND-PE	2.5 kA / 2.5 kA / 2.5 kA
Type of connection	Pluggable in VSPC BASE
Storage temperature	-40 °C ... +80 °C
Ambient temperature (operational)	-40 °C ... +70 °C
Rel. humidity	5 % ... 96 % RH
Degree of protection	IP20
Flammability class	V0

VARITECTOR SSC

VSSC 6AN SL and TR SL – Protection for binary signals (SL) with and without disconnect lever (TR) and indicator (LD)

Two-stage surge protection with screw connection for instrumentation, control and automation technology

- Surge protection in terminal-block format
- Modular width of just 6.2 mm
- Space saving design: 2 binary signals
- Torx® slotted screw connection
- Can be used to comply with the IEC 62305 installation standard and the IEC 61643-1/-22 applications standards
- Integrated PE contact in base element, safely discharges up to 20 kA (8/20 µs) and 2.5 kA (10/350 µs) to PE

Technical Data

General data

Nominal current 500 mA (see derating curve)

Dielectric strength at FG against PE –

Volume resistivity $1.8 \Omega \pm 10\%$

Oversstroked fault mode Mode 2

Requirement category acc. to IEC 61643-21 C2; C3; D1

Standards IEC 61643-21

Surge strength C2 2.5 kA

Surge strength D1 1 kA

Rated discharge current I_N (8/20 µs) wire-wire / wire-PE / GND-PE – / 2.5 kA / –

Rated discharge current I_{max} (8/20 µs) wire-wire / wire-PE / GND-PE – / 10 kA / –

Lightning test current, I_{imp} (10/350 µs) wire-wire / wire-PE / GND-PE – / 1 kA / –

Storage temperature $-40^{\circ}\text{C}...+80^{\circ}\text{C}$

Ambient temperature (operational) $-40^{\circ}\text{C}...+70^{\circ}\text{C}$

Humidity 5...96 % RH

Degree of protection IP20

Flammability class V0

Note

VARITECTOR SSC

VSSC4 MOV – Components

- Two-stage surge protection with screw connection for instrumentation, control and automation technology
- Modular width of just 6.2 mm or 12.4 mm
 - Components built-into terminal block, such as GDT, MOV, TAZ
 - Torx slotted screw connection
 - Integrated PE contact in base element, safely discharges up to 20 kA (8/20 µs) and 2.5 kA (10/350 µs) to PE
 - Accessories: end plate and extension frame

Technical Data

General data

Nominal current I_n at 25 °C	20 A
Response time wire-wire / wire-PE / GND-PE	- / 25 ns / -
Volume resistivity per path	< 0.1 Ω
Surge strength	1 kV / 100 A (10 / 1000 µs), 30 repetitions
Max. continuous voltage	0.25 A / 1 s, 5 repetitions
Combined pulse U_{oc}	5 kV
Overstressed fault mode	Mode 1
Requirement category acc. to IEC 61643-21	C1; C2; C3
Rel. humidity	5%...96% RH
Degree of protection	IP20
Ambient temperature (operational)	-40 °C...+70 °C
Storage temperature	-40 °C...+80 °C
Approvals	UL, CSA pending

Clampable conductor

Connection	Torx screw (T15) / slot (0.8 x 4.0)
Stripping length	7 mm
Tightening torque range	0.5 ... 0.8 Nm
Solid / stranded	0.5 ... 6 mm² / 0.5 ... 4 mm²

Flexible / flexible with ferrule

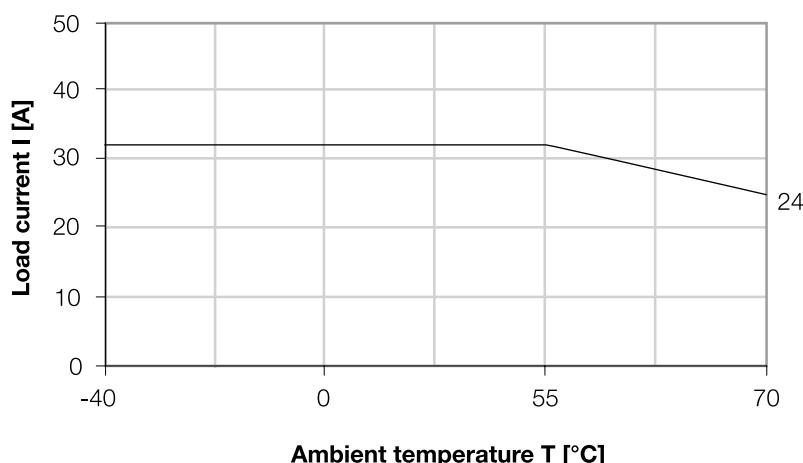

0.5 ... 2.5 mm²

Approvals

UL Listed (USL). Assessed to UL497B. File ref. E 311081

Note: end plate AP VSSC4: 1063120000

VSSC4 TAZ – Components

Single stage surge protection with screw connection for instrumentation, control and automation technology

- Modular width of just 6.2 mm or 12.4 mm
- Components built-into terminal block, such as GDT, MOV, TAZ
- Torx slotted screw connection
- Integrated PE contact in base element, safely discharges up to 20 kA (8/20 µs) and 2.5 kA (10/350 µs) to PE
- Accessories: end plate and extension frame

VSSC4 TAZ

Technical Data

General data

Nominal current I_n at 25 °C 20 A

Volume resistivity per path < 0.1 Ω

Oversubjected fault mode Mode 2

Rel. humidity 5%...96% RH

Degree of protection IP20

Ambient temperature (operational) -40 °C...+70 °C

Storage temperature -40 °C...+80 °C

Approvals UL, CSA

Clampable conductor

Connection Torx screw (T15) / slot (0.8 x 4.0)

Stripping length 7 mm

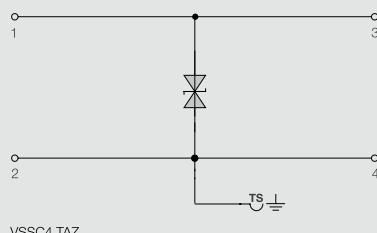

Tightening torque range 0.5 ... 0.8 Nm

Solid / stranded 0.5 ... 6 mm² / 0.5 ... 4 mm²

Flexible / flexible with ferrule 0.5 ... 2.5 mm²

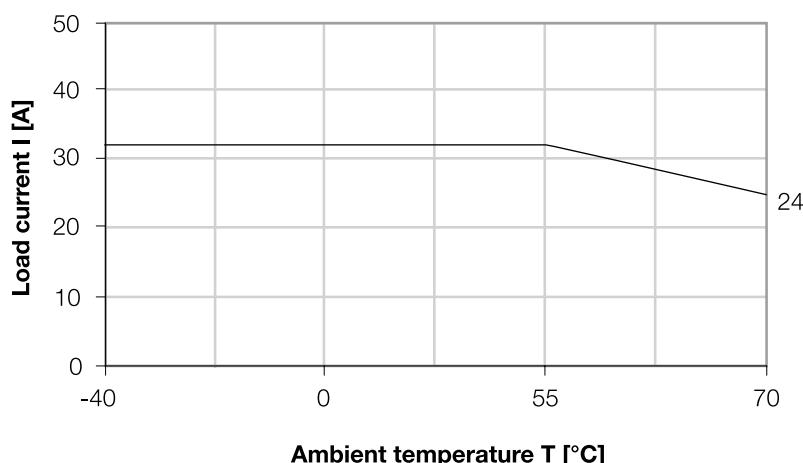

Approvals

UL Listed (USL). Assessed to UL497B. File ref. E 311081
