### Marshalling Solutions For Control Systems

#### NEW

Weidmüller has created a complete system of field wiring termination and control system marshalling for Decision Control Systems (DCS) or Programmable Logic Controller (PLC). This system is comprised of modular components or assemblies that allow for fast, error-free connection of field devices and controllers. These components include:

#### Marshalling Cables

Available in lengths from 1.5 to 100 meters with a variety of end treatments, including:

- Ferruled flying leads
- Tinned flying leads
- Blunt flying leads
- Pluggable 5.08mm connectors (BLZ)
- Ring Lug leads
- Pluggable Clamshell connectors

All cables are marked at each point and contain drain connections on each cable end.

#### Field Termination Assemblies (FTA)

A full line of interface modules is available which greatly reduces cabinet space, shortens the time to marshal and provides error-free connections. Weidmüller FTAs include:

- 8, 16, 24, 48 channel versions
- Field wiring left or right versions
- Screw termination or tension clamp connections
- LED status indication
- Channel disconnects
- Versions with or without test points
- Integrated ground (PE)

#### Terminal Block Kits

For ease of use and flexibility, nothing beats terminal blocks. Weidmüller has created a selection of pre-bundled kits using the industry leading multi-function terminal block line, the WMF. The kits include:

- 4, 16, 32 channel versions
- Pluggable and screw connections
- Integrated ground (PE)
- Versions with or without test points
- Versions with or without disconnect

Using these modular components, almost any combination of discrete or analog signals can be marshalled or wired, regardless of the DCS or PLC used.

## Typical Application Configurations

This marshalling solution has a 32-conductor cable with ferruled flying leads on one end for easy connection to the front panel of the Controller. The field end has a 32 position Clamshell 5.08mm BLZ connector that can easily plug into a Weidmuller 32 pole interface board.

- Ferruled conductors
- Wiring flexibility
- Reduced termination time
- Color coded conductors

Marshalling is made easy with a 32 position Clamshell 5.08mm BLZ connector for connection on the DCS, along with two-16 pole BLZ 5.08 connectors on the field end for a strong connection to the Weidmuller WMF terminal block grouping.

- Reduced termination time
- Color coded conductors

This cable is a 36 conductor cable with a 32 position Clamshell 5.08mm BLZ connector for easy connection on the DCS side along with a 4 pole break out for separated potential connections. On the field side we have two-16 pole Clamshell 5.08mm connectors and a 4-pole connector separate. These connectors provide connection to the Weidmuller WMF terminal block grouping.

- Reduced wiring time
- Four added positions for power distribution options
- Color coded conductors

The 32 to 32 Clamshell cable is a great way to quickly connect between an interface module and the Control system.

- Quick termination
- Reduced install time
- Keyed connectors to reduce potential wiring errors
