Assembly Services

Jumper Cables

With more than 25 years in the cable assembly business, we have experience manufacturing everything from the most basic jumper to complex harnesses with many different cable and connector types. Our high volume production facility produces over 6,000 jumpers per day.

Typical information needed for CATV jumpers:

Length	Color	Connector Manufacturer/Type	Cable Type	Special Requirements
(In Inches)	Black, White, Neutral, Beige	e.g. Gilbert UltraRange™	RG59, RG6 Tri-shield, Quad–shield	e.g. Labels, Boots

Custom Cable Assemblies

WSE has proven capability in making a wide variety of custom cable assemblies, including the most complex. We have worked with most major manufacturers to meet customer specified connectors and cable requirements, and have the design/engineering expertise to address your custom application and installation. Our mini RG59 cables and connectors are ideal for many coax cable assembly applications. In addition, we offer features that simplify identification including color-coding boots and rings, and labels, and full electrical and physical testing.

Applications

- SDI rated digital video
- High performance audio
- DS3/DS4
