

Limitation of Liability

Liability

Any data for the safety switching devices and sensors from Wieland Electric GmbH included in this database/library to the best of our knowledge were created and are exclusively intended for use together with the SISTEMA software provided by the Institute for Occupational Safety and Health of the German Social Accident Insurance (IFA).

However, we assume no liability for any possible mistakes, errors and/or misunderstandings - except for mandatory legal regulations that exist to the contrary.

Use of our devices and sensors is subject to the corresponding technical information (operating instructions, user manuals) provided for these.

Users of this data are not exempt from their accountability to review our specifications and recommendations for their personal use.

We ask you for your understanding and adherence to this note.

Products

In this database you will find most of the safety switching devices and safety sensors from the Wieland Electric GmbH product range; it is updated on a regular basis and continuously extended with new products.
