

WST Series shielding terminals provide convenient grounding and interference immunity for cables that require grounding shields (WTSSeriesterminals.jpg)

Wieland Electric Offers Cable Shield Terminals

Wieland Electric Inc., a leading global manufacturer of innovative electrical interconnect technology, has developed a series of cable shield terminals designed to provide simple, reliable, cable grounding connections. Designed to accommodate cable diameters from 8mm to 32mm, the **fasis** WST terminals provide vibration-proof grounding of shielded cables.

Constructed from hardened steel with high corrosion resistance, these durable terminals are available in configurations for mounting on busbars, TS35 DIN rail, C-profile rails, or direct screw-mounting on flat surfaces. The **fasis** WST Series shielding terminals are ideal for industrial machinery and power equipment that requires grounded cable shields.

“The **fasis** WST Series shielding terminals deliver low-impedance, large area grounding connections for shielded cables, facilitating immunity from interference in industrial and process networks, for fault-free factory operations,” said Martin Lalonde, application engineer at Wieland Electric. “Their practical design makes the WST ideal for retrofit and new applications. The ease of operation ensures that consistent and reliable ground connections are made during initial factory installations, field maintenance and service work.”

About Wieland

Wieland Electric Inc., founded in 1910, is a leading global manufacturer of electrical interconnect technology products. Headquartered in Germany with a North American Operations Center and subsidiaries throughout the world, Wieland Electric has 2200 employees in more than 70 countries to service worldwide customers. Wieland provides solutions to the industrial & building automation, wind, solar, HVAC, and power generation markets. Local inventory, value-added services and technical resources at the North American Operations Center support a national sales and distribution channel. Wieland is ISO 9001 certified.
