

Interface with the D2RS

Willow Technologies Limited (www.willow.co.uk) introduces Durakool's **NEW D2RS Interface Relay**, ideal for **control panels in HVAC** (Heating, Ventilation & Air Conditioning) and **BEMS** (Building Energy Management Systems) environments.

John Merrill, Relays Product Manager at

Willow commented “In addition to this 5A 220VAC DPDT Contact Configuration, Durakool has also introduced a 5A 220 VDC special version of this Interface Relay for high voltage DC applications including Solar Panels and Photovoltaic systems.”

The slim line DIN Rail Mounting D2RS package, suitable for industry standard mounting in control panels uses less space on the DIN rail than traditional relays. It features robust blade terminals for easy insertion into sockets and good quality connections in the socket. The locking test lever makes for easy control panel testing and set up, whilst the LED & mechanical indicators supply visual indication of contact operation and coil energising, for easy fault detection.

“The 5A DPCO & 16A SPCO contact configurations available with the D2RS suit all common applications and replace larger DPCO relays. Durakool continue to offer high quality industry solutions,” Continued Merrill.

ENDS

Editor Information

Founded in 1989, Willow Technologies is located in Copthorne, West Sussex in the UK. We provide electronic solutions to customers by designing, manufacturing and supplying components and systems globally to the electrical and electronic marketplace. Specialists in switching, sensing, resistive and hermetic seal solutions we have a wide portfolio of sensing technologies and over 60 years of application experience. Our in-house engineering capability and rapid prototyping facility for custom parts enable us to develop products to match specific application requirements. Willow is ISO9001:2000 registered.

Durakool is a brand name registered by American Electronic Components, based in Elkhart, Indiana, USA. The Durakool Relay range is extensive, of excellent quality and designed and manufactured to a very high specification.
