# User's Manual

## MB-80580

Wide temperature range 3.5" SBC supports Intel® Atom™ Processor E3800 series; operates within -40°C ~ 85°C, full-range DC input.

## PL-80580

Fanless system support Intel® Atom™ Processor E3800 series operates within -10°C ~ 60°C , full-range DC input.

### Packing list

Before using this product make sure that the following materials have been shipped.

- ▶ 1 x MB-80580 3.5" SBC
- ▶ 1 x CPU cooling fan ( P/N: CB-F0056-00 ) (Note)
- ▶ 1 x SATA cable, L/ 200mm ( P/N: CB-SATA11-00 )
- ▶ 1 x 12V/5V SATA power cable , L/ 150mm ( P/N: CB-IPOW41-00 )
- ▶ 1 x COM port, DB9 type, L/ 180mm, without bracket ( P/N: CB-ICOM34-01 )
- ▶ 1 x CD Utility

Note: CPU cooling fan only comes with verification purpose to ensure motherboard can be operated in a wide range temperature environment. Customers should use proper cooling solution for their application.

**Safety Information**

## **Custom Embedded Solutions**

- To prevent electrical shock hazard, disconnect the power cable from the electrical outlet before relocating the system.
- When adding or removing devices to or from the system, ensure that the power cables for the devices are unplugged before the signal cables are connected. If possible, disconnect all power cables from the existing system before adding a device.
- Before connecting or removing signal cables from the motherboard, ensure that all power cables are unplugged.
- Seek professional assistance before using an adapter or extension cord. These devices could interrupt the grounding circuit.
- Make sure that your power supply is set to the correct voltage in your area.
- If you are not sure about the voltage of the electrical outlet you are using, contact your local power company.
- If the power supply is broken, do not try to fix it by yourself. Contact a qualified service technician or your retailer.

## **Operational Safety**

- Before installing the motherboard and adding devices, carefully read all the manuals that came with the package(s).
- Before using the product, make sure all cables are correctly connected and the power cables are not damaged. If you detect any damage, contact your dealer immediately.
- To avoid short circuits, keep paper clips, screws, and staples away from connectors, slots, sockets and circuitry.
- Avoid dust, humidity, and temperature extremes. Do not place the product in any area where it may become wet.
- Place the product on a stable surface.
- If you encounter technical problems with the product, contact a qualified service technician or your retailer.

## Custom Embedded Solutions

MB-80580 is a 3.5" SBC with onboard Integrated graphics for three display options include HDMI, VGA and 24-bit dual-channel LVDS. One DDR3 SO-DIMM supports a maximum of 4GB DDR3 1333 of system memory.

There're two flexible Mini-PCIe sockets for expansion, one is Full-size type and the other one is half-size type. Both of them are support standard Mini-PCIe card for PCIe & USB (Full-size only) signal-base, such as WiFi. Besides that, A SIM card holder that could install SIM card when install a Full-size Mini-PCIe 3G module for wireless connection. For the Half-size Mini-PCIe socket, it's also support mSATA SSD as storage device.

Regarding I/O ports , MB-80580 provides plenty of connectivity , such as 2x Intel® gigabit Ethernet provided by Intel® i210IT controller, 1 x RS232/422/485 & 3 x RS232, 3 x USB, Audio, 1 x SATA 6Gb/s, 1 x LPC pin-header that could support WIN's TPM module if customer needs to protect information.

MB-80580 that could accept wide range DC 8V ~ 32V input, a external DC locking power jack or a 4-pin internal power connector for easier power integration.

MB-80580 is a small form-factor embedded platform equip with and also rich IO ports, make MB-80580 suitable for a wide range of applications in digital signage, POS, kiosks, and factory automation. Fanless design are allowed for high temperature and dusty environments.

WIN offers reliable and solid products which are produced under Management System Standards: ISO9001-2000 Certificate. The certificate keeps us focused on our quality objectives of management and environmental production. Its willingness to customize standard products for meet unique customer needs makes WIN different. All ODM projects are welcome. Years of experiences enables WIN to fulfill the customer's vision, by delivering products to exact specifications. WIN's R&D team is proud of its strong engineering background. R&D professionals account for 25% of the WIN workforce. We focus on developing new products for both emerging and established markets.

**Note:** (Preliminary definition)

Half-size Mini-PCIe card could support SATA or PCIE signal.

The default setting is set as PCIE signal.

Please into BIOS and select SATA or PCIE signal to match your device.

For example :

Please into BIOS and set " SATA " when you install a half-size add-on card, such as mSATA SSD.

Please into BIOS and set " PCIE " when you install a half-size add-on card, such as WIFI card.

## Custom Embedded Solutions

### - 3.2 Advanced Menu

The Advanced Menu of BIOS Setup Utility allows users to configure advanced system settings.

## Custom Embedded Solutions

### - 3.2.1 ACPI Settings

**Description:** This item is used to configure ACPI like auto configuration, hibernation, sleep state.

## Custom Embedded Solutions

### - 3.2.2 Platform Function

**Description:** Watch Dog can be configured with Mode/Timer/Count parameters. LVDS can be configured with Enable/Channel Model. Mini PCIe can be configured with type/enable options.

## Custom Embedded Solutions

### - 3.2.3 F81866 Super IO Configuration

**Description:** Select 'Enabled' to enable the onboard serial port. The options are Enabled and Disabled.

### - 3.2.3.2 Serial Port 2 Configuration

**Description:** This menu can be used to configure serial port 2. Serial port 2 also supports RS-422 and RS-485.

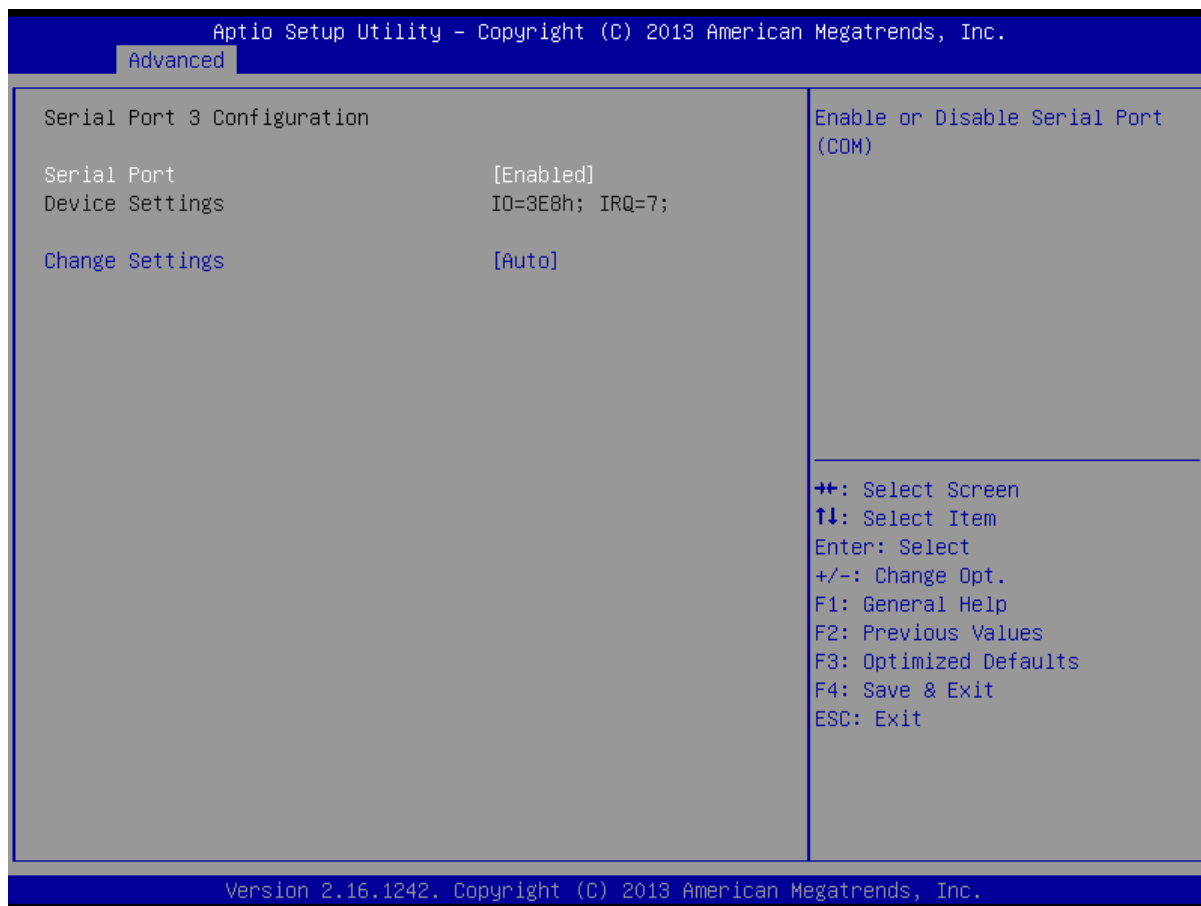

## Custom Embedded Solutions

### - 3.2.3.3 Serial Port 3 Configuration

**Description:** This menu can be used to configure serial port 1. The options are Enabled and Disabled.

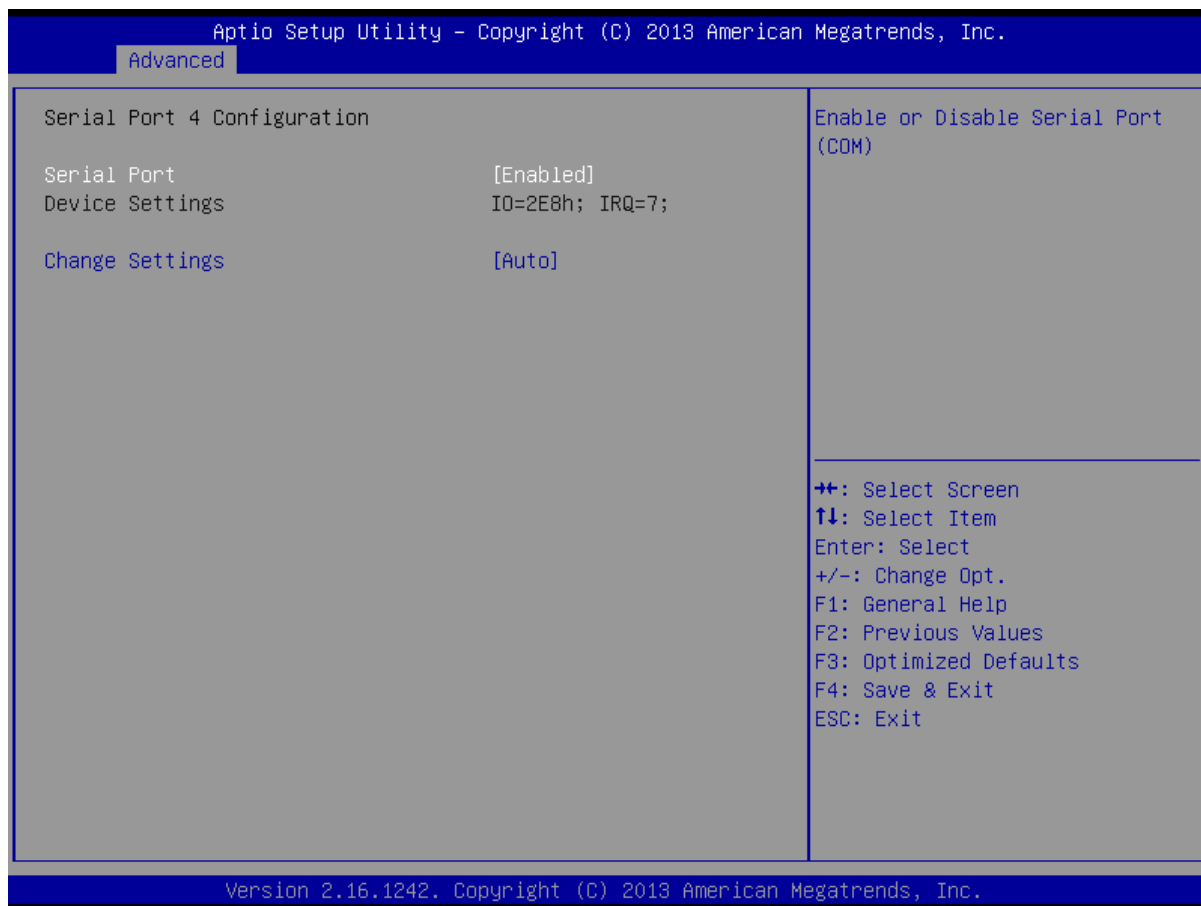

## Custom Embedded Solutions

### - 3.2.3.4 Serial Port 4 Configuration

**Description:** This menu can be used to configure serial port 4. The options are Enabled and Disabled.

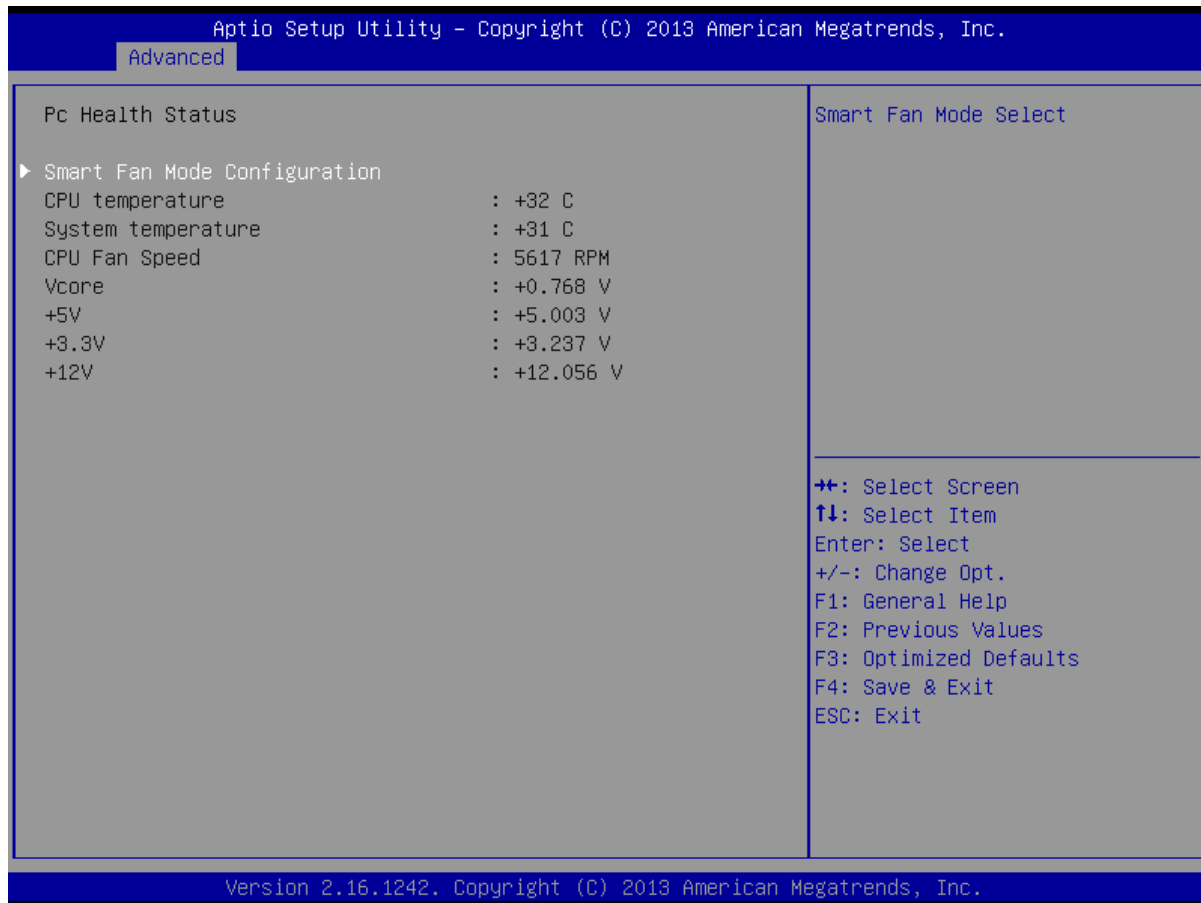

## Custom Embedded Solutions

### - 3.2.4 Hardware Monitor

**Description:** This feature allows the user to check CPU temperature and the fan speed; and also displays the current voltages of the above voltage monitors

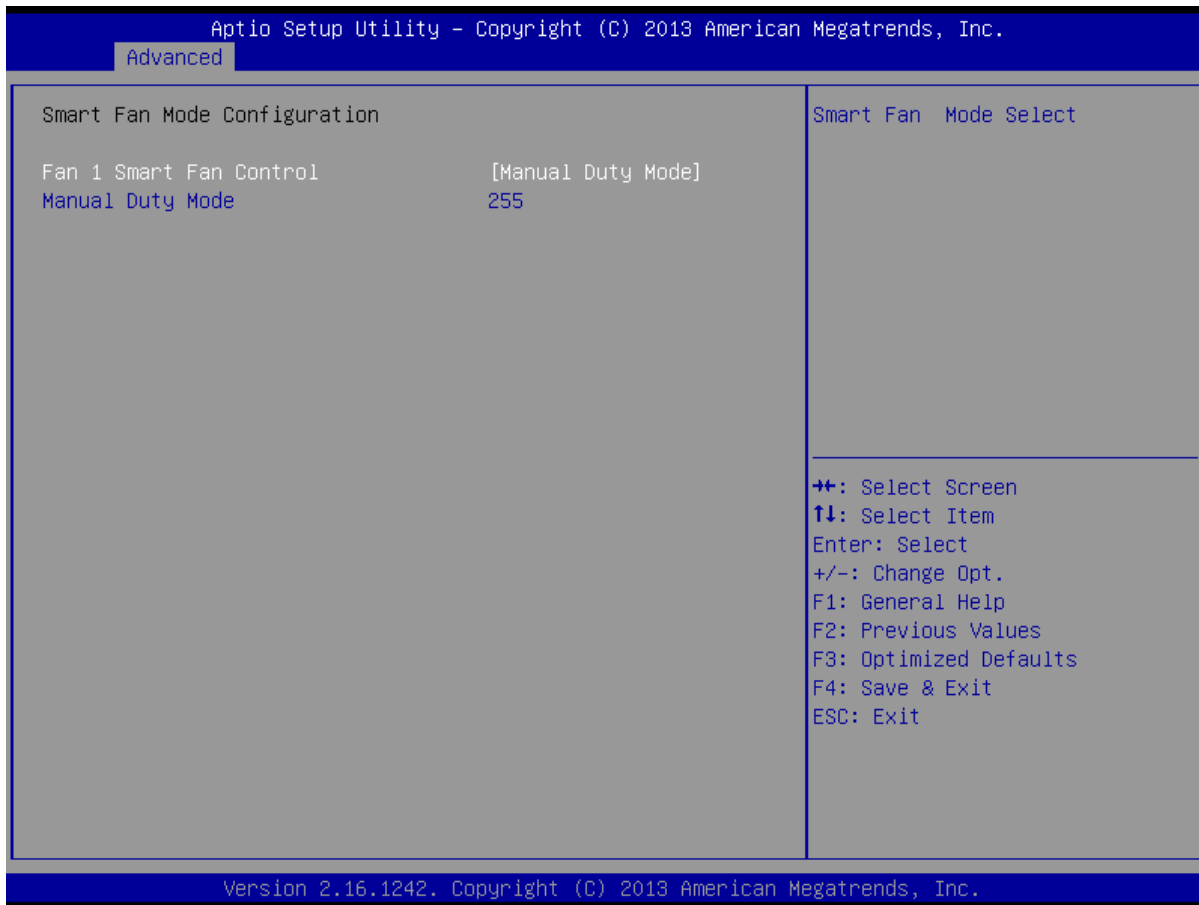

## Custom Embedded Solutions

### - 3.2.4.1 Smart Fan Mode Configuration

**Description:** This feature allows the user to configure smart fan by auto or manual mode.

## Custom Embedded Solutions

### - 3.2.5 Serial Port Console Redirection

**Description:** This feature allows the user to remotely access the entire boot sequence via a serial console.

## Custom Embedded Solutions

### - 3.2.5.1 COM0

**Description:** This feature allows the user to configure the attribute for serial console.

### **- 3.7 Flash BIOS**

To update BIOS, please follow the steps as below to flash BIOS:

1. Press Delete key on BIOS POST time to enter into BIOS setup screen.
2. Select all boot device to Disabled in Boot page.
3. Save Changes and Reset.
4. BIOS will boot to shell.
5. Select your drive contain BIOS bin file and FPT64.efi and fparts.txt(the 3 files need in same folder).  
(normally drive name is : fs0 , fs1 , fs2 .... ; if the files in fs0 just type fs0: then press Enter key)
6. shell command "ls" = DOS command "dir"
7. shell command "cd" = DOS command "cd"
8. Flash BIOS command : fpt64 -f filename.bin
9. Wait for flash BIOS, with success, power off and restart your system.
