

## **S&C Announces Strategic Alliance with XetaWave to Expand Grid Connectivity Solutions**

September 4, 2014 - S&C Electric Company and XetaWave have announced a strategic alliance to develop next-generation communications technologies that will expand S&C's capabilities to provide high-throughput, low-latency mesh radio networks for use in smart grid applications. These communication networks enable the grid to connect and communicate at high speeds, an essential component of S&C's real-time self-healing grids. The two companies will combine their innovative technologies and field-proven experience to provide electric utilities and major power users grid connectivity solutions that address their current and future needs.
