

## **XetaWave Doubles Size of Manufacturing Facility to Support Increased Demand for Its Products**

LOUISVILLE, CO, July 20, 2015 / -- XetaWave, a Colorado-based leader in wireless technology, today announced that it has more than doubled the size of its manufacturing facility to support increased demand for its products. As part of the expansion, XetaWave upgraded many of its capabilities including the installation of a permanent state of the art ESD floor and enforced ESD management system and implementation of a highly efficient factory process layout incorporating lean manufacturing principles. The expanded manufacturing facility also incorporates a robust and scalable process design; a future proofed infrastructure (i.e., electrical, data systems, floor space); new high efficient lighting and HVAC systems; a flexible work cell layout; and a point of use production inventory management system.

Selma Salihagic, XetaWave manager of test and production, said “The expanded manufacturing area will help us achieve our goal of delivering the highest quality product to our customers. It will also enable us to quickly and cost effectively prototype and manufacture new products and respond to customer requests. In addition, it enhances our strategic goal for contemporary manufacturing principles such as Lean and Six Sigma, thus increasing the overall efficiency of our manufacturing operation. Through the expansion, our capacity now has the potential to increase 5x in the short term.”

Jonathan Sawyer, XetaWave co-founder and chief executive officer, commented, “This expansion represents a very exciting time in the growth of XetaWave. XetaWave is experiencing increased demand for its products both within the US and beyond, forging partnerships with very large OEMs, and continuing to expand its product offering. XetaWave designs, manufactures and tests 100% of its radios in house which provides us with a distinct competitive advantage.”

### **About XetaWave**

Founded in 2010, XetaWave is a leading provider of the industry’s most advanced, high performing, cost effective platform of software defined radios across multiple bands to meet the worldwide application needs of industries such as oil and gas, water and wastewater, electric power, and the military. The current platform of XetaWave radios includes Xeta9 (902-960 MHz) dual band ISM/MAS, Xeta9-XX Double X (902-960 MHz) offering speeds up to 8.8 Mbps, Xeta1 (150-232 MHz), Xeta2 (216-232 MHz), Xeta3 (VHF/UHF 225-380 MHz), Xeta4 (406-512 MHz) – full duplex, Xeta14 (1.4 GHz), Xeta24 (2.4 GHz), Ethernet and Serial IO. All XetaWave radios are 100% designed, manufactured, and tested in-house at its headquarters in Louisville, Colorado.
