

XetaWave Expands Manufacturing in Boulder *Selma Salihagic Joins XetaWave as Manager of Test & Production*

BOULDER, May 6, 2013 / -- XetaWave, a Colorado-based wireless technology provider, announced today that Selma Salihagic has joined XetaWave to expand and manage its manufacturing and procurement operations in Boulder due to increased demand of its radios. Salihagic has demonstrated results in manufacturing, customer service, repair and contract management with both small and large organizations. Prior to joining XetaWave, Salihagic was an engineering manager at Ball Aerospace & Technologies and a senior manufacturing manager at SpectraLink.

Jonathan Sawyer, cofounder and chief executive officer of XetaWave commented, “We believe that the rapid growth of our business is indicative of industry demand for our radios in key industry sectors. We are excited that Salihagic has joined XetaWave given her breadth of experience and results at other companies. She will be very instrumental in supporting our growth as we continue to expand our customer base and deliver the highest quality of products.”

Additionally, XetaWave announced it is moving into expanded office space to meet its continued growth needs including the implementation of an in-house manufacturing line.

About XetaWave

Founded in 2010, XetaWave develops innovative wireless technologies for customized industrial and military applications. Co-founded and led by Jonathan Sawyer and Robert Campbell, XetaWave is comprised of renowned experts in the wireless and disk drive technology industries. The synergy of such expertise has resulted in the development of an innovative, highly reliable, cost effective technology platform. XetaWave is based in Boulder, Colorado.
