Overview

Juggler is a 19" rack mount manual lighting control desk specifically designed for the smaller stage; a perfect solution for small scale lighting systems. Channel faders are set in a conventional two preset layout for easy crossfading. A fade time control allows smooth fades to be achieved over periods as long as 5 minutes. All crossfades are true dipless. This ability to hold constant lighting levels and varying fade times allows sophisticated lighting plots to be replayed simply and accurately.

Juggler controls up to 24 channels using preset faders avoiding the cost and complexity of more sophisticated lighting desks. Applications include schools, houses of worship, rental and conference events.

For larger shows, the wide mode feature allows 24-channel operation, with an internal scene store for two-preset operation. 12 sequences of 99 steps can be stepped manually to provide a simple cue list with go button functionality. Sequences may also be chased using the adjustable speed control.
