

S7 ENGINEERING and Zodiac Aerospace Services get together to inaugurate leading edge water and waste repair capabilities in DME

Moscow, December 20, 2016 – S7 ENGINEERING (a part of ENGINEERING Holding) water and waste repair shop, built and equipped in close collaboration with Zodiac Aerospace Services, was inaugurated on the 8th of December 2016 in Moscow Domodedovo airport (DME). The project comes as part of S7 ENGINEERING's efforts to strengthen the aerospace and the MRO industry in Russia and to relocate repair capabilities closer to Russian and CIS operators.

Since the long-term agreement between the two companies was signed in December 2015, S7 ENGINEERING had been busy with construction works of the new premises, which received certification in accordance with Russian Ministry of Transport and EASA guidelines in November 2016. This 130 sq.m. brand new repair shop, featuring Zodiac Aerospace VTTS© equipment (Vacuum Toilet Test Stand), will be able to process more than 200 vacuum toilets per year (A320 family, Boeing 737NG, 777, and 767 toilets).

ENGINEERING Holding is now able to provide competitive and reliable vacuum toilet repairs with a very short TAT following rigorous and sophisticated control procedures approved by Zodiac Aerospace. This will translate into major benefits for Russian and CIS operators, from major cost savings to easier logistics & customs, together with local Russian speaking customer services, technical support and direct access to Zodiac Aerospace product improvements.

About Zodiac Aerospace and Zodiac Aerospace Services

Zodiac Aerospace is a world leader in aerospace equipment and systems for commercial, regional and business aircraft and for helicopters and spacecraft. It develops and manufactures state-of-the-art solutions to improve comfort and wellbeing on board aircraft, and high-technology systems to increase aircraft performance and flight safety. Zodiac Aerospace has 35,000 employees worldwide and generated revenue of €5.2bn in 2015/2016.

Zodiac Aerospace Services is the dedicated aftermarket and services organization of the Zodiac Aerospace Group. Committed to deliver the best performance and services, Zodiac Aerospace Services offers a global distribution network of spare parts and components, maintenance of equipment manufactured by the Zodiac Aerospace Group, customized support services for airline operators and dedicated technical support. Based in the United States, in Europe, in the Middle East, in Asia and in Australia, Zodiac Aerospace Services provides 24/7 AOG spare services to airlines and operators in the world.

About ENGINEERING Holding

ENGINEERING Holding, a leading MRO provider on the Russian market, delivers a wide variety of base and line maintenance, repair, engineering and manufacturing services for major aircraft types. Company's subsidiaries – «S 7 ENGINEERING» and «Sibir Technics» – maintain aircraft in the airports of Moscow (DME), Novosibirsk (OVB), and Mineralnye Vody (MRV), and in line maintenance stations in airports across Russia.

ENGINEERING Holding's facilities are certified by EASA, Bermuda DCA, Russian Aviation Authorities and a number of other national authorities to carry out maintenance for Boeing, Airbus, Sukhoi Superjet, and Cessna aircraft. The company's scope of work includes heavy maintenance (up to and including D-Checks), line maintenance, CFM56 engine maintenance, structural repairs, engineering services (including modification under EASA Part 21J and interior components manufacture under EASA Part 21 G), component repairs, aircraft painting services, and training services (under EASA Part 147). ENGINEERING Holding aims for ongoing improvement of its products, partially supported by joint projects with OEMs. The company delivers its services to airlines from Russia, Europe, Asia and Middle East, providing its clients with over 100 heavy maintenance forms and over 1000 light maintenance forms per year.
