

TC4519BP 4-BIT AND/OR SELECTOR

The TC4519BP is a combined gate available as 4-bit AND/OR select gate, quad 2-channel data selector or quad exclusive-NOR gate according to the conditions of two control inputs A and B.

Since all the outputs are provided with the buffers of two-stage inverters, the input/output transmission characteristics have been improved and the noise immunity has been elevated. Thus, as increase in propagation delay time caused by an increase in load capacity is kept to a minimum.
