

500MHz Rail-to-Rail Amplifiers

The 5962-0721301QHC, 5962-0721302QHC, and 5962-0721303QDC are fully DSCC SMD compliant parts and the SMD data sheets are available on the DSCC website (<http://www.dscclia.mil/programs/specfind/default.asp>). The 5962-0721301QHC is electrically equivalent to the EL8202, the 5962-0721302QHC is electrically equivalent to the EL8203, and the 5962-0721303QDC is electrically equivalent to the EL8403. Reference equivalent "EL" data sheet for additional information. These parts are dual and quad rail-to-rail amplifiers with a -3dB bandwidth of 500MHz and slew rate of 600V/ μ s.

Running off a low supply current of 13.5mA per channel, the 5962-0721301QHC, 5962-0721302QHC, and 5962-0721303QDC also feature inputs that go to 0.15V below the V_{S-} rail. The 5962-0721301QHC and 5962-0721302QHC are dual channel amplifiers. The 5962-0721303QDC is a quad channel amplifier.

The 5962-0721301QHC includes a fast-acting disable/power-down circuit with a 25ns disable and a 200ns enable, the 5962-0721301QHC is ideal for multiplexing applications.

Features

- 500MHz -3dB bandwidth
- 600V/ μ s slew rate
- Supplies from 3V to 5.5V
- Rail-to-rail output
- Input to 0.15V below V_{S-}
- Fast 25ns disable (5962-0721301QHC only)

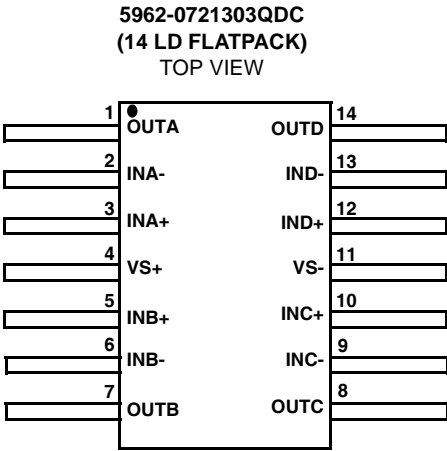

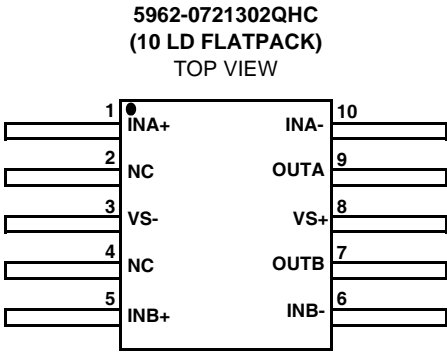

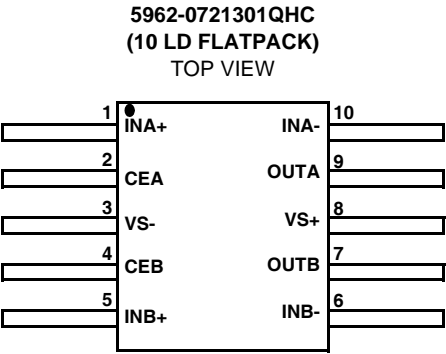

Applications

- Video amplifiers
- Portable/hand-held products
- Communications devices

Ordering Information

PART NUMBER	PART MARKING	PACKAGE	PKG. DWG. #
5962-0721301QHC	0721301QHC	10 Ld Flat Pack	K10.A
5962-0721302QHC	0721302QHC	10 Ld Flat Pack	K10.A
5962-0721303QDC	0721303QDC	14 Ld Flat Pack	K14.A

Pinouts

Absolute Maximum Ratings ($T_A = 25^\circ\text{C}$)

Supply Voltage from V_{S+} to V_{S-} 5.5V
 Input Voltage $V_{S+} + 0.3\text{V}$ to $V_{S-} - 0.3\text{V}$
 Differential Input Voltage 2V
 Continuous Output Current 20mA / Op Amp

Power Dissipation 74.3mW / Op Amp
 Storage Temperature -65°C to $+150^\circ\text{C}$
 Ambient Operating Temperature -55°C to $+125^\circ\text{C}$
 Operating Junction Temperature $+150^\circ\text{C}$

CAUTION: Stresses above those listed in "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied.

IMPORTANT NOTE: All parameters having Min/Max specifications are guaranteed. Typ values are for information purposes only. Unless otherwise noted, all tests are at the specified temperature and are pulsed tests, therefore: $T_J = T_C = T_A$

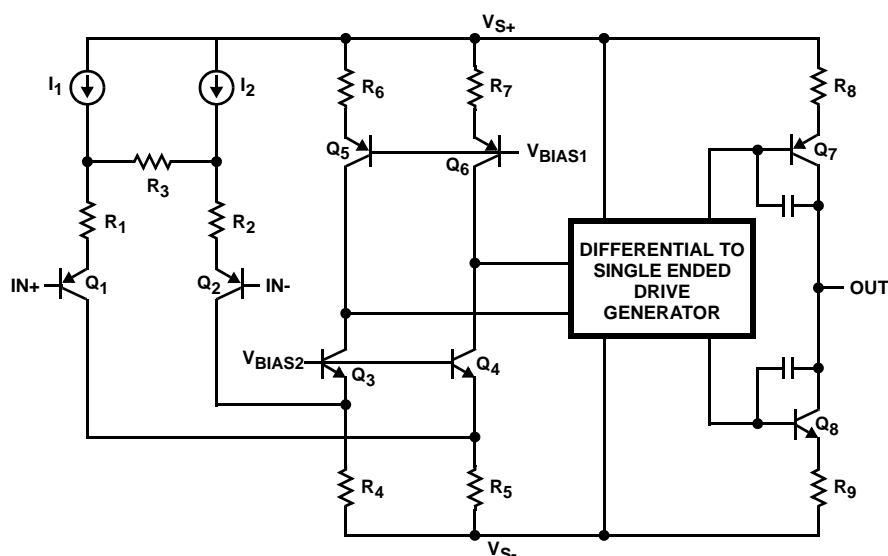

Electrical Specifications $V_{S+} = 5\text{V}$, $V_{S-} = \text{GND}$, $T_A = 25^\circ\text{C}$, $V_{CM} = 2.5\text{V}$, R_L to 2.5V, $A_V = 1$, Unless Otherwise Specified

PARAMETER	DESCRIPTION	CONDITIONS	MIN	TYP	MAX	UNIT
INPUT CHARACTERISTICS						
R_{IN}	Input Resistance	Common Mode		3.5		$M\Omega$
C_{IN}	Input Capacitance			0.5		pF

NOTES:

1. Index area: A notch or a pin one identification mark shall be located adjacent to pin one and shall be located within the shaded area shown. The manufacturer's identification shall not be used as a pin one identification mark. Alternately, a tab (dimension k) may be used to identify pin one.
2. If a pin one identification mark is used in addition to a tab, the limits of dimension k do not apply.
3. This dimension allows for off-center lid, meniscus, and glass overrun.
4. Dimensions b1 and c1 apply to lead base metal only. Dimension M applies to lead plating and finish thickness. The maximum limits of lead dimensions b and c or M shall be measured at the centroid of the finished lead surfaces, when solder dip or tin plate lead finish is applied.
5. N is the maximum number of terminal positions.
6. Measure dimension S1 at all four corners.
7. For bottom-brazed lead packages, no organic or polymeric materials shall be molded to the bottom of the package to cover the leads.
8. Dimension Q shall be measured at the point of exit (beyond the meniscus) of the lead from the body. Dimension Q minimum shall be reduced by 0.0015 inch (0.038mm) maximum when solder dip lead finish is applied.
9. Dimensioning and tolerancing per ANSI Y14.5M - 1982.
10. Controlling dimension: INCH.
