## MC12095

### 2.5 GHz Low Power Prescaler With Stand-By Mode

The MC12095 is a single modulus prescaler for low power frequency division of a 2.5 GHz high frequency input signal. MOSAIC $\mathrm{V}{ }^{\mathrm{TM}}$ technology is utilized to achieve low power dissipation of 24 mW at a minimum supply voltage of 2.7 V .

On-chip output termination provides output current to drive a 2.0 pF (typical) high impedance load. If additional drive is required for the prescaler output, an external resistor can be added in parallel from the OUT pin to GND to increase the output power. Care must be taken not to exceed the maximum allowable current through the output.

Divide ratio control input (SW) selects the required divide ratio of $\div 2$ or $\div 4$. Stand-By mode is available to reduce current drain to $100 \mu \mathrm{~A}$ typical when the standby pin SB is switched LOW disabling the prescaler.

## Features

- 2.5 GHz Toggle Frequency
- Supply Voltage 2.7 V to 5.5 Vdc
- Low Power 8.7 mA Typical
- Operating Temperature -40 to $85^{\circ} \mathrm{C}$
- Divide by 2 or 4 Selected by the SW Pin

## FUNCTIONAL TABLE

| SW | Divide Ratio |
| :---: | :---: |
| H | 2 |
| L | 4 |

1. $\mathrm{SW}: \mathrm{H}=\left(\mathrm{V}_{\mathrm{CC}}-0.4 \mathrm{~V}\right)$ to $\mathrm{V}_{\mathrm{CC}} ; \mathrm{L}=\mathrm{OPEN}$
2. $\mathrm{SB}: \mathrm{H}=2.0 \mathrm{~V}$ to $\mathrm{V}_{\mathrm{CC}} ; \mathrm{L}=\mathrm{GND}$ to 0.8 V

#### Abstract

ON Semiconductor and are trademarks of Semiconductor Components Industries, LLC (SCILLC). SCILLC reserves the right to make changes without further notice to any products herein. SCILLC makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does SCILLC assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. "Typical" parameters which may be provided in SCILLC data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. SCILLC does not convey any license under its patent rights nor the rights of others. SCILLC products are not designed, intended, or authorized for use as components in systems intended for surgical implant into the body, or other applications intended to support or sustain life, or for any other application in which the failure of the SCILLC product could create a situation where personal injury or death may occur. Should Buyer purchase or use SCILLC products for any such unintended or unauthorized application, Buyer shall indemnify and hold SCILLC and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that SCILLC was negligent regarding the design or manufacture of the part. SCILLC is an Equal Opportunity/Affirmative Action Employer.
