VCO/PLL+IF Single-Chip IC AN18420A for ETC Vehicle Onboard Equipment

Overview

AN18420A is a single-chip IC that incorporates a VCO/PLL block and an IF block to significantly reduce the size and the number of parts used in the wireless block of onboard 5.8GHz electronic toll collection (ETC) systems. This makes a sizable contribution to the design of more compact onboard equipment for ETC vehicles, a product that is expected to grow in popularity.

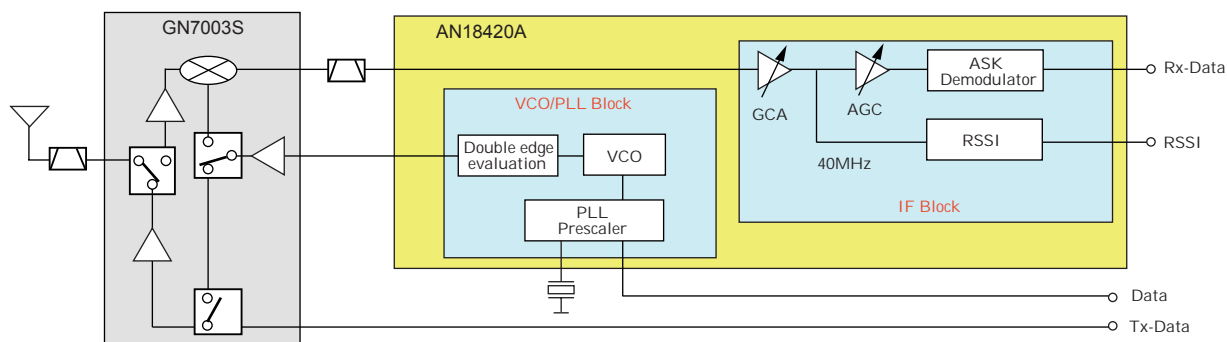

Features

- Substantial space-saver for the wireless block of ETC vehicle onboard equipment. Compactly packaged IC combines with Panasonic MMIC (GN7003S) for the wireless block of ETC vehicle onboard equipment.
- Full incorporation of VCO circuitry including oscillation circuit. Use of SiGe-Bi CMOS process allows full incorporation of 2.9GHz VCO.
- Single-chip configuration includes both VCO/PLL block and IF block.

Applications

- ETC vehicle onboard equipment

■ Absolute Maximum Ratings

Parameter	Symbol	Rating	Unit	Note
Storage temperature	Tstg	-55 to 150	°C	1
Operating ambient temperature	Topr	-40 to 100	°C	1
Supply voltage	V _{CC}	2.95	V	
Supply current	I _{CC}	95	mA	
Power dissipation	Pd	0.1764	W	2

Note1) Except for the operation ambient temperature and storage temperature, all ratings are for Ta=25 °C.

Note2) Ta=100 °C, Package only.
