

To all our customers

---

**Regarding the change of names mentioned in the document, such as Mitsubishi Electric and Mitsubishi XX, to Renesas Technology Corp.**

---

The semiconductor operations of Hitachi and Mitsubishi Electric were transferred to Renesas Technology Corporation on April 1st 2003. These operations include microcomputer, logic, analog and discrete devices, and memory chips other than DRAMs (flash memory, SRAMs etc.) Accordingly, although Mitsubishi Electric, Mitsubishi Electric Corporation, Mitsubishi Semiconductors, and other Mitsubishi brand names are mentioned in the document, these names have in fact all been changed to Renesas Technology Corp. Thank you for your understanding. Except for our corporate trademark, logo and corporate statement, no changes whatsoever have been made to the contents of the document, and these changes do not constitute any alteration to the contents of the document itself.

Note : Mitsubishi Electric will continue the business operations of high frequency & optical devices and power devices.

# MITSUBISHI 16-BIT SINGLE-CHIP MICROCOMPUTER M16C FAMILY M32C/80 SERIES

M32C/80  
GROUP

Draft Specification

Rev 0.10 : September 13, 2002

Rev 0.11 : September 19, 2002

Rev 0.12 : November 20, 2002

Specifications written in this manual are believed to be accurate, but are not guaranteed to be entirely free of error.

Specifications in this manual may be changed for functional or performance improvements. Please make sure your manual is the latest edition.

## About M32C/80 Group

The M32C/80 group of single-chip microcomputers use the high-performance silicon gate CMOS process. They use the M32C/80 Series CPU core and are packaged in a 100-pin plastic molded QFP. This single-chip microcomputer operates using sophisticated instructions. With 16M bytes of address space, it is capable of executing instructions at high speed. Because of its high level of ROM efficiency, the size of external ROM can be reduced to about half. In addition, this microcomputer contains peripheral functions such as multiplier and DMAC which combined with fast instruction processing capability, makes it suitable for control of various OA, communication, and industrial equipment which requires high-speed arithmetic/logic operations.

## Applications

Audio, cameras, office equipment, communications equipment, portable equipment, etc.

Revision History .....	11

**Performance Outline**

Table 1.1.1 shows a performance outline of M32C/80 group.

**Table 1.1.1. Performance outline of M32C/80 group (100-pin version)**

Item		Performance
CPU	Number of basic instructions	108 instructions
	Shortest instruction execution time	33 ns( $f(XIN)=30MHz$ )
	Operation mode	Microprocessor mode
	Memory space	16 M bytes
	Memory capacity	See ROM/RAM expansion figure.
Peripheral function	I/O port	47 pins (8 bits separate bus P1, P6 to P10 except P85)
	Input port	1 pin (P85)
	Multifunction timer	Output 16 bits x 5 (TA0, TA1, TA2, TA3, TA4) Input 16 bits x 6 (TB0, TB1, TB2, TB3, TB4, TB5)
	Three phase motor control circuit	1 circuit
	HDLC data process	2 channels
	Serial I/O	5 channels (UART0 to UART4) IE Bus <sup>(Note 1)</sup> , I <sup>2</sup> C Bus (Note 2)
	A-D converter	10 bits x 1 circuits, standard 8 input, max 26 input
	D-A converter	8 bits x 2 circuits
	DMAC	4 channels
	DMAC II	Start by all variable vector interrupt factors Immediate transfer, operation and chain transfer function
	CRC calculation circuit	CCITT-CRC
	X-Y converter	16 bits X 16 bits
	Watchdog timer	15 bits x 1 (with prescaler)
	Interrupt	41 internal and 8 external sources, 4 software sources, 7 interrupt priority levels
	Clock generating circuit	4 built-in clock generation circuits • Main clock              • Subclock • PLL synthesizer        • Ring oscillator clock
Electric characteristics	Supply voltage	3.0 to 5.5V ( $f(XIN)=30MHz$ without software wait)
	Power consumption	38mA ( $f(XIN)=30MHz$ without software wait, Vcc=5V)
	I/O characteristics	I/O withstand voltage I/O current
Operating ambient temperature		-40 to 85°C, -20 to 85°C
Device configuration		CMOS high performance silicon gate
Package		100-pin plastic mold QFP

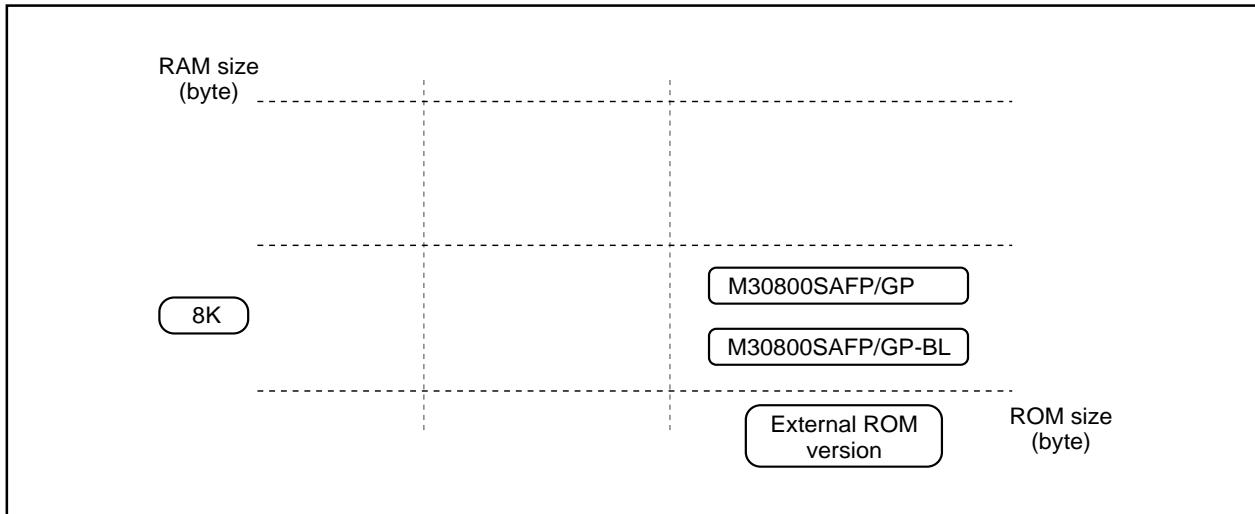

Note 1 :IE Bus is a trademark of NEC corporation.

Note 2 :I<sup>2</sup>C Bus is a registered trademark of Philips.

## Group Expansion and Product type

Mitsubishi plans to release the following product options as the M32C/80 group:

- (1) ROM type : External ROM version and External ROM version with Boot loader
- (2) ROM/RAM variation : Figure 1.1.1
- (3) Package type
  - 100P6S-A : 0.65mm Pin Pitch Plastic molded QFP
  - 100P6Q-A : 0.5mm Pin Pitch Plastic molded QFP

**Figure 1.1.1. ROM expansion**

The M32C/80 group products are listed in Table 1.1.2.

**Table 1.1.2. M32C/80 group**

**As of September 2002**

Type No	ROM capacity	RAM capacity	Package type	Remarks
M30800SAFP	**	8K	100P6S-A	External ROM version
M30800SAGP			100P6Q-A	
M30800SAFP-BL			100P6S-A	External ROM version with Boot Loader
M30800SAGP-BL			100P6Q-A

## Pin Configuration and Pin Description

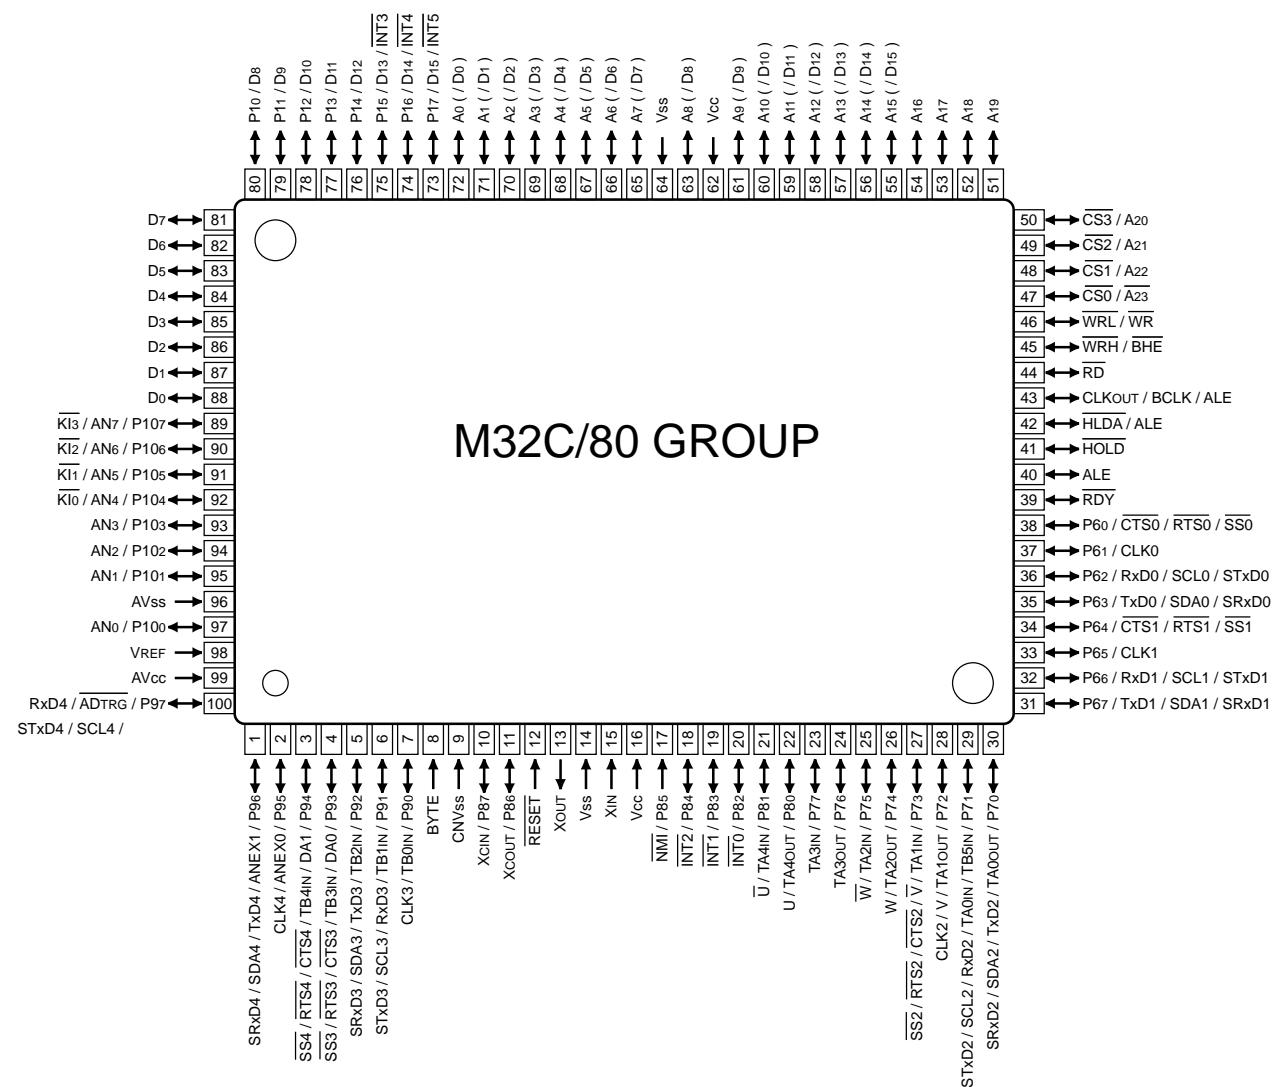

Figure 1.1.3 to 1.1.4 show the pin configurations (top view), table 1.1.3 list pin names.

P70 and P71 are N-channel open drain output.

Package: 100P6Q-A

Figure 1.1.3. 100-pin version pin configuration (top view)

P70 and P71 are N-channel open drain output.

Package: 100P6S-A

Figure 1.1.4. 100-pin version pin configuration (top view)

**Table 1.1.3. 100-pin version pin description (1/2)**

Package Pin No		Control	Port	Interrupt	Timer	UART	Analog	Bus control
FP	GP							
1	99		P96			TxD4/SDA4/SRx4D4	ANEX1	
2	100		P95			CLK4	ANEX0

## Revision History

Rev.0.10 -- September 13, 2002

New document

Rev.0.11 -- September 19, 2002

•Page 3      Table 1.1.1 "CAN" deleted.

Rev.0.12 -- November 20, 2002

•Page 2      "About M32C/80 Group" changed.

•Page 3      Table 1.1.1

"4.2 to 5.5V" --> "3.0 to 5.5V"

"3.0 to 3.6V (f(XIN)=20MHz without software wait)." deleted.

"26mA (f(XIN)=20MHz without software wait,Vcc=3.3V)" deleted.
