

TOSHIBA BIPOLAR LINEAR INTEGRATED CIRCUIT SILICON MONOLITHIC

TA8748AN

DOUBLE CCD COMB IC FOR TV, VTR

The TA8748AN is for double comb filter Y/C separation and vertical edge enhancement using the logic of majority decision.

Due to this logic, the Y/C Separation by this IC have no dot appearance or color protruding.

FEATURES

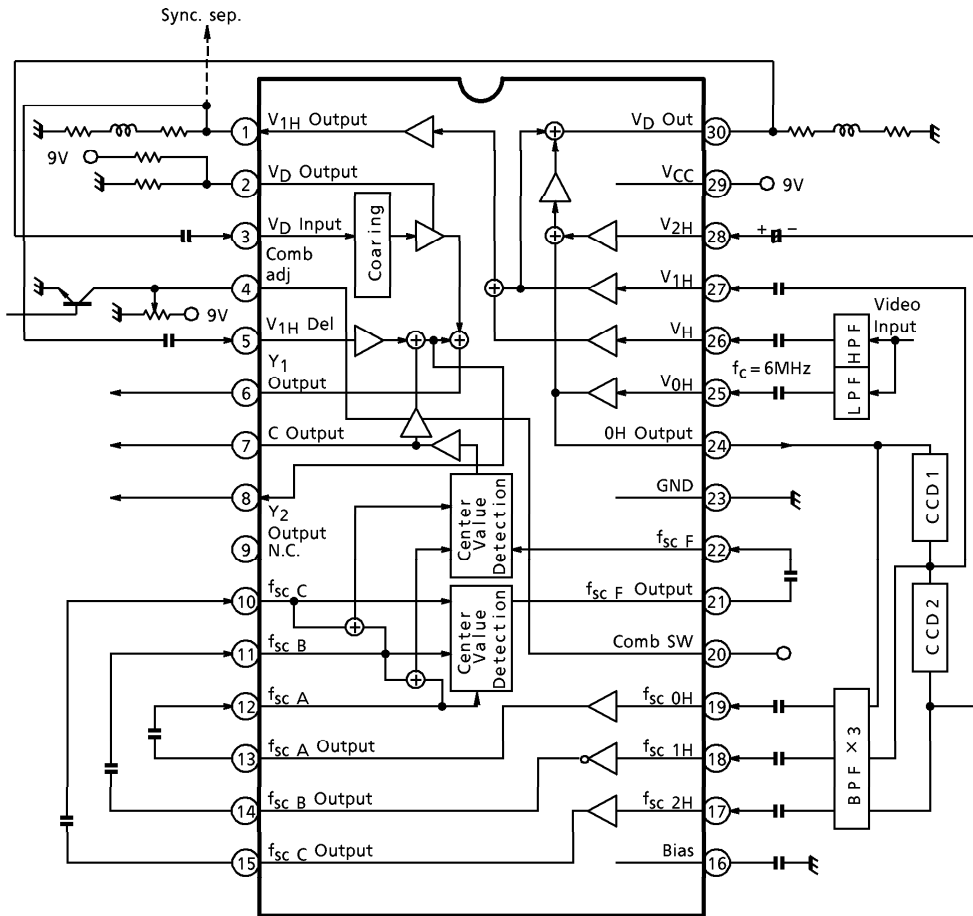

- 3 Line Comb Filter Operation
- Center Value Detecting Circuit
- Vertical Edge Sharpness Correction (Vertical Secondary Differential)
- Vertical Edge Sharpness Correction Level Control
- Edge Sharpness Correction Signal Coring and Peak Clip

SDIP30-P-400-1.78

Weight : 1.99g (Typ.)

BLOCK DIAGRAM

MAXIMUM RATINGS (Ta = 25°C)

CHARACTERISTIC	SYMBOL	RATING	UNIT
Power Supply Voltage	V _{CC}	12	V
Power Dissipation	P _D max	1560 (Note 1)	mW
Input Terminal Signal Voltage	e _{in}	5	V _{p-p}
Operating Temperature	T _{opr}	- 20~65	°C
Storage Temperature	T _{stg}	- 55~150	°C

(Note 1) When using the device at above Ta = 25°C, decrease the power dissipation by 12.5mW for each increase of 1°C.

(Note 2) These devices are easy to be damaged by static voltage or electric fields. Please handle with care.

ELECTRICAL CHARACTERISTICS (Unless otherwise specified, $V_{CC} = 9V$, $T_a = 25^\circ C$)

							② Vj = 0.1Vp-p, 0.14Vp-p,
							③ Vj = 0.4Vp-p, 0.45Vp-p
33	VD Center Gain	b	c	8.5V	4.5V		(2) Measure TP6 Output Level of V6 (Vi).
							(3) Get ① V6 (5mV) / 5mV,
							② V6 (0.14V) - V6 (0.1V) / 0.14V - 0.1,
							③ V6 (0.45V) - V6 (0.4) / 0.45V - 0.4
							(1) V1 Input ; f0 = 15kHz, Vj = 0.1Vp-p, 0.14Vp-p
							(2) Measure the output level V6 (Vi) of TP6.
							(3) Measure the V6 (0.14V) - 6V (0.1V) / 0.14V - 0.1V

NOTE No.	CHARACTERISTICS	TEST CONDITION (V _{CC} = 9.0V, T _a = 25 ± 3°C)						TEST METHOD
		SW & VR MODE				TP27	TP4	
		SW3	SW5	c	b			
34	V _D Min. Gain	b	c	0.5V	4.5V		(1) V ₁ Input ; f ₀ = 15kHz, V _i = 0.1V _{p-p} (2) Measure the output level of the TP6. (3) Get Gain against input.	
35	V _D Amp Frequency Characteristics	b	c	9V	4.5V		(1) V ₁ Input ; f : variable, V _i = 0.14V _{p-p} (2) Measure the output level of the TP6. (3) Get frequency to make output be -3dB lower than that at f = 1MHz.	
36	V _D Amp Dynamic Range	b	c	9V	4.5V		(1) V ₁ Input ; f ₀ = 15kHz, V = 0.1V _{p-p} (2) Measure the output waveform of TP6. (3) Get input level to make output wave form be distorted by except coring.	
37	V _{1H} Amp Gain	c	b	4.5V	4.5V		(1) V ₁ Input ; f ₀ = 15kHz, V _i = 1.0V _{p-p} (2) Measure the output level of TP6. (3) Get Gain against input.	
38	V _{1H} Amp Frequency Characteristics	c	b	4.5V	4.5V		(1) V ₁ Input ; f : variable, V = 1.0V _{p-p} (2) Measure the output level of TP6. (3) Get frequency to make output be -3dB lower than that at f = 1MHz.	
39	V _{1H} Amp Dynamic Range	c	b	4.5V	4.5V		(1) V ₁ Input ; f ₀ = 15kHz, V variable (2) Measure the output waveform of TP6. (3) Get input level to make output wave form be distorted.

TEST CIRCUIT

TA8748AN - 15

DOUBLE COMB FILTER UNIT ADJUSTMENT

1. Initial Condition

Input Signal : Linearity Signal $2V_{p-p}$
 f_{sc} Signal : $1V_{p-p}$
 V_R : RB51~58 : Center

2. Input Signal Amplitude

Adjust RB57 to make signal Amplitude at QB05 emitter by $1V_{p-p}$.

3. Amplitude, Phase of 1H Delay Signal

Sum up TA8748AN pin 12 Signal and reversed pin 11 Signal with Oscilloscope.
Adjust RB51 and RB52 mutually to make this summed signal be minimum level.

4. Amplitude, Phase of 2H Delay Signal

Sum up TA8748AN pin 10 Signal and reversed pin 11 Signal with Oscilloscope.
Adjust RB53 and RB54 mutually to make this summed signal be minimum level.

5. Vertical edge Enhance Signal

Adjust RB58 to make pin 30 signal be minimum level.

6. Comb Filter Gain, Phase

Monitor Y_{out} .
Adjust RB55 and RB56 mutually to make Chroma element be minimum level.

7. Y_{out} Amplitude

Adjust RB57 to make the amplitude of Y_{out} Video (without SYNC) to be $1.43V_{p-p}$.

PACKAGE DIMENSIONS
SDIP30-P-400-1.78

Unit : mm

Weight : 1.99g (Typ.)

RESTRICTIONS ON PRODUCT USE

000707EBA

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- The products described in this document are subject to the foreign exchange and foreign trade laws.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA CORPORATION for any infringements of intellectual property or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any intellectual property or other rights of TOSHIBA CORPORATION or others.
- The information contained herein is subject to change without notice.
